Q.26 Define the ante-mortem examination and its principles of Judgment?

Q.27 Briefly explain about mycotoxins.

Q.28 Define an egg? Explain the candling process of eggs.

Q.29 Explain the storage process of eggs?

Q.30 How can grains are prevented from spoilage?

Q.31 Give different factors which affect the quality and shelf life of milk.

Q.32 Write a brief note on infestation control in grains.

Q.33 What are the physiological changes that occur after harvesting?

Q.34 Write the various steps involved in storage of grains?

Q.35 Write the advantages of modern grain storage structure?

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

Q.36 What are the various unit operations of post harvest handling?

Q.37 Define conveying system? Name different type of conveyors used for material handling and explain any two with neat and clean diagram?

Q.38 Describe the various preparations of grains for storage. What are the various storage requirements? Explain.

Time : 3Hrs. M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

Q.1 How fresh vegetables should be transported to maintain the longest shelf life?

a) Normal trucks
b) Refrigerated trucks
c) Open trains
d) Motorbikes

Q.2 Any grass cultivated for the edible components of its grain, composed of endosperm, germ and bran is known as:

a) Pulses b) Oilseeds
c) Cereals d) All of the above

Q.3 The act or cost of moving, storing or packaging goods is known as:

a) Handling b) Caring
c) Threshing d) None of the above

Q.4 What is the different egg grades?

a) A,B,C b) AA, A, B
c) A, AA, AB d) None of these

Q.5 The flow rate of materials in a bucket conveyor depends on:
a) Shape of the buckets
b) Spacing of the buckets
c) Speed of the conveyor
d) All of the above

Q.6 Which factor most significantly affects food quality during transport?
a) Geography b) Mode of transport
c) Infrastructure d) All of the above

Q,7 High moisture and ware climate for stored grain is responsible for
a) Mold growth
b) Insect growt
c) Increase respiration of grain
d) All of the above

Q.8 Safe storage moisture level of grain crop is generally below the range of
a) 4 to 6 % b) 12 to 13%
c) 20 to 21% d) 8 to 9%

Q.9 "Dry ice", often used for temporary cooling during transport, is the solid form of which gas?
a) Nitrogen b) Carbon dioxide
c) Oxygen d) Argon

Q.10 What is "Candling" primarily used for in the egg industry?
a) To cook the egg slightly
b) To clean the shell
c) To inspect internal defects and shell cracks without breaking the egg
d) To determine the breed of the hen

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

Q.11 The cost of mechanical drying per unit of grains as compared to sun drying is _____. (Low / High)

Q.12 How much grain is contaminated by rodent of own actual weight? (20 times / 50 times)

Q.13 Pusa bin storage structure, which is made of _____. (Plastic / Kachha Brick)

Q.14 Grading refers to _____.

Q.15 Ante mortem examination is done _____ slaughtering.

Q.16 Air cell is located at the _____ end of egg.

Q.17 At Rigor mortis meat is ______

Q,18 The process of evaluating the quality of egg is ______

Q.19 The technique to draw a sample is called_____

Q.20 Name of yellow part of egg is ______.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

Q.21 Write in brief how improper storage resulted in deterioration of fruits and vegetables?

Q.22 What are the causes of spoilage of food grains?

Q.23 What factors should keep in mind for selecting different conveying systems.

Q.24 Write a brief note on pre-slaughter handing of meat animals.

Q.25 Describe different preparation steps of grains for storage.
