Q.18 Describe the procedure for reticulocyte count using supravital stain.

Q.19 Write a note on physiological variations in hematological parameters.

Q.20 Explain laboratory findings in aplastic anemia.

Q.21 Describe the principle and interpretation of red cell fragility test.

Q.22 Disccuss classification of anemias based on morphology and etiology.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

Q.23 Discuss in detail the laboratory diagnosis of megaloblastic and iron deficiency anemias.

Q.24 Explain the methods of estimating ESR and PCV, including their advantages and limitations.

Q.25 Describe reticulocyte count - principle, procedure, reference values, and interpretation.

No. of Printed Pages : 4 221932/181932/121932/031932

Roll No. ....

3rd Sem / DMLT, DMLT (For Speech and Hearing Impaired)

Subject : Clinical Haematology-I / Haematology- III/ Clinical Haematology - III

Time : 3 Hrs. M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

Q.1 The anticoagulant commonly used for ESR estimation (Westergren method) is:

a) EDTA b) Heparin

c) Sodium citrate d) Oxalate

Q.2 The PCV value represents:

a) White blood cell percentage

b) Volume of packed red blood cells

c) Volume of plasma

d) Hemoglobin content

Q.3 MCH stands for :

a) Mean Cell Hamoglobin

b) Mean Corpuscular Hemoglobin

c) Mean Cell Hematocrit

d) Mean corpuscular Height

Q.4 The stain used for reticulocyte counting is:

a) Leishman stain

b) Giemsa stain

c) New methylene blue

d) Hematoxylin and eosin

Q.5 Megaloblastic anemia is mainly caused by deficiency of:

a) Iron

b) Vitamin B_{12} / Folic acid

c) Vitamin C

d) Copper

Q.6 Increased osmotic fragility of RBCs is found in:

a) Thalassemia

b) Hereditary spherocytosis

c) Sickle cell anemia

d) Aplastic anemia

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

Q.7 Write the formula for MCV.

Q.8 State one merit of PCV estimation.

Q.9 Give the reference range of MCHC.

Q.10 Mention one factor that decreases ESR.

Q.11 Define Anemia in one sentence.

Q.12 Name any one method for ESR estimation.

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

Q.13 Explain the principle and procedure of ESR estimation by Wintrobe method.

Q.14 Write short notes on merits and demerits of Hb estimation methods.

Q.15 Discuss factors affecting ESR values.

Q.16 Explain the procedure and interpretation of PCV estimation.

Q.17 Define MCV, MCH, and MCHC, and explain their clinical significance.
