Q.24 Explain standard mould parts.

Q.25 Explain mould housing.

Q.26 Explain Allowances.

Q.27 Describe dimensional tolerances.

Q.28 Explain examples of conceptual designs.

Q.29 Explain the Mould data

Q.30 Describe concept of software packages.

Q.31 Describe Elastomer processing software.

Q.32 Explain the worksheets.

Q.33 Explain Heating circuit layouts.

Q.34 Explain principles of plastic processing.

Q.35 Explain the features of moulds.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

Q.36 Explain with diagram:-

'ALTERNATIVE CONCEPTUAL DESIGN'.

Q.37 Explain various design parameters for optimum mould design with proper diagram?

Q.38 If clamping force=800KN. The max injection volume with 400 no. of keys=140 cm^3, and max. injection pressure with 400 keys=1000bar, Determine the shot capacity of the injection unit.

(20)

No. of Printed Pages : 4 202035

Roll No. ....

3rd Year / Advance Diploma in Tool & Die Making
Subject:- Tool Design Practice-III (Plastic Moulds)

Time : 4Hrs. M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

Q.1 The external form of moulding

a) core b) cavity

c) Ejector d) Register king

Q.2 In multiple cavity mould gate is channel that connects

a) Runner with impression

b) Machine nozzle with impression

c) Machine nozzle with runner

d) All

Q.3 Which material not made by injection moulding

a) Nuts b) Tubes

c) Car handle d) Electrical fitting

Q.4 Wafer of material escape from impression if two mould half not completely closed

a) flash b) slug

c) vent d) Air

Q.5 How die used in injection moulding cooled?

a) oil b) Air

c) water d) all

Q.6 A moulding with projection to outside surface of component called

a) undercut moulding b) blow moulding

c) underfeed moulding d) none

Q.7 Hole in side of moulding can be formed by

a) split cavity b) side core

c) finger cam d) None

Q.8 When mould is opened space between mould plates called

a) shut height b) Day light

c) Impression d) Tool height

Q.9 In hot runner mould, Runner kept at

a) Elevated temperature within mould

b) Normal temperature within mould

c) Below normal temperature

d) All of these

Q.10 Plastics can be shaped into

a) Sheets b) films

c) Fibers d) All of these

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

Q.11 Define moulding design.

Q.12 Define design layouts.

Q.13 Define mould parts.

Q.14 What is gating system.

Q.15 Define heating layout.

Q.16 Define conceptual design.

Q.17 Write use of bill of materials.

Q.18 The portion of cast which form the external shape is __________.

Q.19 Expand CAD.

Q.20 Channels through which molten flows into the die cavity are _________.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

Q.21 Explain applications of designs in manufacturing of moulds.

Q.22 Explain mould design practice.

Q.23 Explain components of mould materials.
