Q.31 Name five type of glazes.

Q.32 List three coloring oxides used in glazes and their its colors.

Q.33 State difference between under glazes and over glaze decoration.

Q.34 What is batch mixing in glaze preparation?

Q.35 Explain enamel. Mention two advantages of enamel.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

Q.36 Name different type of clays. Write its properties and uses.

Q.37 Explain frit making process with flow chart.

Q.38 Define glaze and classification of glaze.

No. of Printed Pages : 4 180436/120436/
Roll No. 030436/0425/0431

3rd Sem / Ceramic
Sub : Ceramic Raw Materials

Time : 3Hrs. M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

Q.1 Volcanic ash is example of_____ material

a) Fluxing b) Plastic

c) Soft d) None of these

Q.2 The Plasticity of clay is due to ______.

a) Shape of clay particle

b) Size of clay particle

c) Presence of water

d) All of these

Q.3 Which clay is most suitable for making sanitary ware?

a) Ball clay b) Fire clay

c) Alumina Clay d) None of these

Q.4 The feldspar in body _______ the maturing temperature.

a) Decreases b) Increase

c) No change d) None of these

Q.5 Talc is example of ____ material.

a) Plastic b) Non clay plastic

c) Binder d) None of these

Q.6 Formula of china clay is_____.

a) $Al_2O.3H_2O$ b) $A1_2O_32SiO_22H_2O$

c) $2SiO_2.2H_2O$ d) None of these

Q.7 Bone ash chemically is ________

a) $Ca_2 (PO_4)_22$ b) $CaCo_3$

c) MgO d) All of these

Q.8 _______ is one example of colouring oxide used in glaze.

a) Cobalt oxide b) Ball clay

c) China clay d) All of these

Q.9 Frit making process involves_____.

a) Mixing b) Smelting

c) Quenching d) All of these

Q.10 Under glaze decoration is applied

a) Before glazing b) After glazing

c) During firing d) All of these

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

Q.11 The formula of Sillimanite is $Al_2O_3SiO_2$. (T/F)

Q.12 Quenching is frit production is done in ______ (Water / Oil)

Q.13 Fritting is done to convert fine materials in to bulky form. (T/F)

Q.14 Talc mineral is very ______. (Hard/Soft)

Q.15 Feldspar is a flux material. (T/F)

Q.16 The formula of feldspar is _______.

Q.17 Nepheline syenite is _____ raw material. (Flux / Deflocculant)

Q.18 Glaze is thin layer of glass coating of ceramic ware. (T/F)

Q.19 Enamel is applicable on metal sheet surface. (T//F)

Q.20 Application method of glaze on ceramic body is ______ (Dipping / Blunging)

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

Q.21 Explain primary clays.

Q.22 List of plastic raw materials with example.

Q.23 What is fire clay? Mention of its properties.

Q.24 Write properties and uses of quartz.

Q.25 Name steps of making frit. Explain any one process.

Q.26 List of non clay plastic raw materials, and its uses.

Q.27 Draw process flow diagram of frit making.

Q.28 Write properties and uses of Cornish stone.

Q.29 Write properties and uses of Kyanite.

Q.30 Name different raw materials of silica. Write its role.
