Q.26 Give a five differences between direct mapping and associative mapping.

Q.27 Explain RAM and ROM chips.

Q.28 Write note on Cross-Bar switches.

Q.29 Explain DMA data transfer technique.

Q.30 Explain Flash memory.

Q.31 Write a short note on SISD.

Q.32 Write short note on synchronous and asynchronous data transfer.

Q.33 Discuss main characteristics of RISC Architecture.

Q.34 Differentiate between Microprogrammed and hardwired control.

Q.35 Write difference between programmed I/O and Interrupt I/O.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

Q.36 Explain various addressing modes along with example.

Q.37 Explain Pipelining and its techniques with diagram.

Q.38 What is memory management hardware. Explain memory connections to CPU.

No. of Printed Pages : 4 180845/170845/120845
Roll No. .... /030845/031065B

4th Sem / Comp, IT
Subject:- Computer Organization

Time : 3Hrs. M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

Q.1 Name of the parallel processing

a) SIMD, MIMD b) MIMD

c) MISD, SISD d) All of above

Q.2 RAM can be ________

a) DRAM b) ROM

c) PROM d) MEPROM

Q.3 Which of the following is an input device?

a) Plotter b) Printer

c) LED Monitor d) Keyboard

Q.4 Cache memory is located between ______ and _____

a) CPU and main memory

b) HDD and RAM

c) RAM and ROM

d) There is not such space

Q.5 The DMA transfer are performed by a control circuit called as

a) Device interface b) DMA Controller

c) Data controller d) Database

Q.6 How many Pipelining exits_______

a) 2 b) 3

c) 4 d) 5

Q.7 Using a ______ buffer the instructions fetch segment is implemented

a) FIFO b) LIFO

c) MIFO d) SIFO

Q.8 Both the CISC and RISC architectures have been developed to reduce the_______

a) Cost b) Time display

c) Semantic gap d) All the mentioned

Q.9 Parallel processor is

a) Distributed architecture

b) Pipelining

c) BIOS

d) RISC

Q.10 Which part of the computer is used for calculating and comparing?

a) RAM b) ALU

c) CU d) RAM

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

Q.11 One byte is equivalent to_________

Q.12 The full form of WORM_________

Q.13 BIOS stands for_______.

Q.14 DMA stands for_______.

Q.15 EEPROM stands for

Q.16 CISC stands for________.

Q.17 The________ stores the intermediate data used during the execution of the instructions.

Q.18 Define Control Word.

Q.19 Post stand for_________.

Q.20 The simultaneously use of more than one CPU to execute a program is known as__________.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

Q.21 Explain DMA data transfer technique.

Q.22 List functions of BIOS.

Q.23 Discuss general register organisation.

Q.24 Explain reverse polish notation with example.

Q.25 Explain the concept of virtual memory.
