SECTION-B

Note: Objective type questions. All questions are compulsory.
 (10x1=10)

Read the following passage and answer the questions given below.

Happiness is very simple term which is used commonly. But how many of us really know the meaning of true happiness and how to attain that state? Not many! Most people look for happiness outside. They believe that they can be happy if they possess certain things or be with certain people or reach a professional height. This is what they have been fed with since their childhood. While all they mentioned things are essentials for a good living, they cannot bring happiness.

Happiness is essential for an individual's emotional comfort. A person who is not fit emotionally will feel an impact on his complete health that will drain very soon. Unluckily, despite the fact that happiness is tremendously necessary, people do not give so much importance to all those habits which can keep them happy. They are so excessively captivated inside their professional lives as well as other nuts and bolts of life that they overlook to relish the happy memories of their life. It is also the main reason that problems like anxiety, stress and depression are increasing gradually in people's lives today.
