- Q.5 In the cockpit of a transport airplane, at least one manual fire-extinguisher must be conveniently located containing:
- a) Halon                      b) Powder
  - c) Special Fluids          d) Water
- Q.6 When an aircraft has sustained damage, the aircraft shall be allowed to resume its flight if \_\_\_\_\_ considers it airworthy.
- a) ICAO                      b) State of operation
  - c) State of registry        d) None of the above
- Q.7 Clearance to land or any alternative clearance received from the non-radar controller should normally be passed to the aircraft before it reaches a distance of:
- a) 3 NM from touchdown
  - b) 5 NM from touchdown
  - c) 4 NM from touchdown
  - d) 2 NM from touchdown
- Q.8 Computer system used for maintenance should have at least one backup system which should be updated at least within
- a) 72 hours of any maintenance
  - b) 24 hours of any maintenance
  - c) 48 hours of any maintenance
  - d) NOTA

- Q.9 Who should be responsible for monitoring the amendment of the MOE.
- a) Quality assurance manager
  - b) Quality manager
  - c) As in (a) and operator
  - d) As in (b) and operator
- Q.10 Which is the most expensive maintenance check of all?
- a) A-Check                      b) D-Check
  - c) C-Check                      d) B-Check

### SECTION-B

**Note:** Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 What is FAA?
- Q.12 What do you mean by Air safety?
- Q.13 What is an AME?
- Q.14 What is recorded in log book?
- Q.15 Name two mandatory documents.
- Q.16 Who controls the flight path?
- Q.17 What is the full form of DGCA?
- Q.18 What is special flight permit?
- Q.19 What is microlight?
- Q.20 Name two main instrument in aircraft?

### SECTION-C

**Note:** Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Who certifies military aircrafts for airworthiness?
