

- Q.27 Discuss the main features of boring machine.
- Q.28 Enlist five accessories used in drilling machines.
- Q.29 Give four operations to be performed on milling machines.
- Q.30 Write a short note on angular milling.
- Q.31 Discuss about different types of abrasives.
- Q.32 What is the difference between soldering and brazing?
- Q.33 Describe the arc welding process with its applications.
- Q.34 Write a short note on gear hobbing.
- Q.35 What is the function of press brakes? Explain its working.

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 What is the principle of drilling? How the drilling machines are classified on the basis of their construction and work performed?
- Q.37 Discuss about various types of coolants and lubricant used for various machining processes.
- Q.38 Compare cylindrical and centreless grinding in detail.

Roll No.

4th Sem / Agri. Engg., Auto Engg. Subject:- Manufacturing Technology-II

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Geometrical deviation from nominal surface, present on a machined surface known as
a) Waviness b) Wear
c) Surface roughness d) Fins
- Q.2 In a milling machine cutting tool is mounted on
a) Table b) Column
c) Arbor d) None of these
- Q.3 The common natural abrasives is/are
a) Sand stone b) Diamond
c) Emery d) All of these
- Q.4 Productivity index of CNC machine is ratio of _____
a) Input divided by output
b) Output divided by output
c) time divided by space d) All of these

(1) 180144/120144/030144

Q.5 Al_2O_3 stands for

- a) Aluminium trioxide b) Silicone oxide
- c) Bakelite d) Aluminium oxide

Q.6 _____ is a method of joining two or more metal parts by means of a molten metal as filler material below the temperature of 420°C .

- a) Gas welding b) Soldering
- c) Brazing d) Resistance welding

Q.7 _____ is the mostly used for finishing internal cylindrical surfaces such as drilled or bored holes.

- a) Boring b) Drilling
- c) Honing d) Reaming

Q.8 The speed at which drill revolves is called.

- a) Cutting speed b) Drilling speed
- c) Speed d) None of these

Q.9 Honing is the used for finishing the _____.

- a) Abrasives b) Gears
- c) Grinding wheel d) Drilled/bored holes

Q.10 The standard colour of acetylene gas cylinder is _____

- a) Maroon b) Red
- c) Black d) Green

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

Q.11 Define grinding.

Q.12 Define boring.

Q.13 Bending dies.

Q.14 State two applications of soldering.

Q.15 List two types of drill holding devices.

Q.16 Give two benefits of CNC machines.

Q.17 Super finishing operations.

Q.18 Name of two types of welding.

Q.19 Oxygen cylinders are filled at a pressure of _____.

Q.20 Drill chuck is used for _____.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

Q.21 What are various welding defects?

Q.22 Explain the principle of boring.

Q.23 What should be the safety precautions in use of cutting fluid?

Q.24 Enlist the types of pipe fittings.

Q.25 Explain the working of CNC machine.

Q.26 Describe the process of lapping.
