

- Q.30 Enlist name of five organizations dealing in testing and standardization of farm machinery.
- Q.31 Explain the different types of losses during threshing and their management.
- Q.32 Write down functions of a duster. Also enlist different types of dusters.
- Q.33 What is the principle of threshing? Also write different methods of threshing.
- Q.34 Explain the working principle of groundnut digger shaker.
- Q.35 Discuss about constructional details of a combine harvester.

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Explain the constructional details and working principle of laser land leveler.
- Q.37 Describe the working principle and constructional details of power thresher along with its different components.
- Q.38 What is mower? Enlist different types of mowers. Also explain the constructional details and working principle of flail mower.

Subject:- Farm Machinery & Implements - II

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 It is the clearance between beater or cylinder tip and concave.
- a) Concave clearance b) Horizontal clearance
c) Cylinder clearance d) Vertical clearance
- Q.2 Wheel handhoe operated by_____.
- a) Wheel b) Pedal
c) Hand d) Motor
- Q.3 _____ is a machine used to apply powdered pesticides or other dry chemicals to crops.
- a) Sprayer b) Fogger
c) Duster d) All of these
- Q.4 The ratio of real peripheral speed to forward speed of combine is called:
- a) Velocity index
b) Angular velocity index
c) Kinematic index
d) Reel Speed index
- Q.5 Length of cutter bar for the tractor operated mower or vertical conveyor reaper is_____.

- a) 1.5-3.0m b) 3.0-4.5m
c) 4.5-5.5m d) More than 5m
- Q.6 Which sprayers are operated usually with internal combustion engines?
a) Foot sprayer b) Power sprayer
c) Hydraulic sprayer d) Commercial sprayer
- Q.7 Puddling is done to:
a) Reduce percolation of water
b) Kill weeds
c) Pulverize soil
d) Level the fields
- Q.8 Annual depreciation of a machine is included in:
a) Variable cost b) Fixed cost
c) Hiring cost d) All of these
- Q.9 It is important equipment used in paddy cultivation.
a) Wheel hand hoe b) Khurpa
c) Spade d) Paddy weeder
- Q.10 Pick-up reels in combine harvester are very effective in:
a) Cutting of upright crops
b) Lifting of lodged (down) crops ahead of cutter bar
c) Both (a) and (b) are true
d) None of the above

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Write different types of machines used for application of fertilizers & manures for different crops.

- Q.12 Give names of type of spray.
Q.13 State the function of cage wheels?
Q.14 Write down the function of bund former.
Q.15 What is in-situ and ex-situ management of paddy?
Q.16 What is threshing?
Q.17 Give names of different types of sprayers.
Q.18 Write two benefits of land levelling.
Q.19 Write functions of power weeder.
Q.20 Give any two machine names used for harvesting of different crops.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Write down the working and constructional details of tine cultivator.
Q.22 Enlist the various horticultural tools and machines.
Q.23 Explain the types of spray as per volume application.
Q.24 Discuss the procedure for cost estimation of farm machinery.
Q.25 Describe the different types of mowers used for harvesting forage crops.
Q.26 Write down advantages of disadvantages of combines harvester.
Q.27 What should be safety precautions taken during the use of insecticides and pesticide?
Q.28 Describe working principle of vertical conveyor reaper.
Q.29 Describe different types of nozzles used in sprayers.
