

- ### SECTION-D
- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Compare and contrast the "Save" and "Save As" commands in Auto Cad . When would you use each one?
- Q.37 Explain the significance of setting units in Auto CAD. How can you access the Units setting, and what are some common unit types available?
- Q.38 Explain the importance of maintaining consistent units, grid and snap settings throughout a drawing project in Auto Cad .

6th Sem / Architecture Assistantship
Sub : Advanced Computer Applications

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Which file format is commonly used for importing 3D models into Auto Cad?
- a) .DWG
 - b) .STL
 - c) .PDF
 - d) .JPEG
- Q.2 What is the primary purpose of exporting a drawing in Auto Cad?
- a) To print the drawing
 - b) To create a backup file
 - c) To share the drawing with others who don't have AutoCAD.
 - d) To change the drawing's color scheme
- Q.3 How can you access the Units settings in Auto Cad?
- a) By clicking on the file menu
 - b) By typing "UNITS" in the command line
 - c) By right-clicking on the drawing area
 - d) By clicking on the View tab
- Q.4 How to you access the Layer Properties Manager in Auto Cad to name layers?
- a) By typing "LAYER" in the command line
 - b) By clicking on the file menu
 - c) By right clicking on the drawing area
 - d) By typing "RENAME" in the command line

- Q.5 What is the purpose of merging drawings in Auto CAD?
- To create a new drawing from multiple existing drawings
 - To compress the file size of a drawing
 - To export drawings to different file formats
 - To import external files into a drawing
- Q.6 Which Auto Cad feature allows you to link external files such as images or spreadsheets to your drawing?
- File Merge
 - External Reference (Xref)
 - File Save As
 - Layer Manager
- Q.7 Which command is used to import a file into an existing AutoCAD drawing?
- INSERT
 - EXPORT
 - SAVEAS
 - MERG
- Q.8 Which command is used to rename a layer in Auto CAD?
- LAYER
 - RENAME
 - MODIFY
 - DELETE
- Q.9 When you save a drawing in Auto CAD using the "Save As" option, what file format is typically used?
- .DWG
 - .PDF
 - .JPEG
 - .XLSX
- Q.10 Which unit type is NOT available in Auto Cad's Units setting?
- Decimal
 - Architectural
 - Fractional
 - Circular

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Auto Cad's External reference (Xref) feature allows you to link external files such as images or spreadsheets to your drawing. (True/False)

(2) 180265A/120265A

- Q.12 You can rename a layer in Auto Cad using the MODIFY command. (True/False)
- Q.13 In Auto Cad, you cannot delete layers that contain objects. (True/False)
- Q.14 The ERASE command in Auto Cad is used to remove objects from a layer. (True/False)
- Q.15 Exporting a drawing in Auto Cad creates a backup copy of the drawing. (True/False)
- Q.16 Renaming a layer in Auto Cad only changes its display name and does not affect any objects on that layer. (True/False)
- Q.17 Merging drawings in Auto Cad combines multiple drawings into one. (True/False)
- Q.18 When you delete a layer in Auto Cad, it becomes hidden but still retains its properties. (True/False)
- Q.19 Exporting a drawing in Auto Cad creates a backup copy of the drawing. (True/False)
- Q.20 When you save a drawing in Auto Cad using the "Save As" option, it automatically converts the drawing to a different file format. (True/False)

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 How do you import an external file into an existing Auto Cad drawing?
- Q.22 What are the uses of Auto Cad?
- Q.23 Explain the procedure to convert Auto Cad drawing file to PDF file format.
- Q.24 Explain briefly any five commands of Auto Cad.
- Q.25 Describe the process of creating a line in Auto Cad. Provide step-by-step instructions on how to use the Line command.

(3) 180265A/120265A
