

- Q.24 Explain wheel balancing.
 Q.25 Describe the working of disc brake.
 Q.26 Write down the working of wheel cylinder.
 Q.27 Describe the various factors affecting excessive tyre wear.
 Q.28 Describe a method of testing of Brakes.
 Q.29 Explain anti-lock breaking system.
 Q.30 Write down the advantages of independent suspension system.
 Q.31 Explain the working of vacuum brakes.
 Q.32 Explain about Cruise Control.
 Q.33 Write any five faults in braking system and their causes.
 Q.34 Write down the constructional details of wheel rim.
 Q.35 Explain the function of wheels.

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
 Q.36 Explain the principle, construction and working of telescopic shock absorber with diagram.
 Q.37 Explain the construction and working of Air Hydraulic brake with diagram.
 Q.38 Explain in the brief-tube tyre and tubeless tyre. Also write advantages of tubeless tyre over tube tyre (radial tyre).

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Which of the following is not a power brake:
 a) Vacuum brake b) Air brake
 c) Air Hydraulic brake d) Hydraulic brake
- Q.2 A tandem master cylinder has
 a) One piston b) Two pistons
 c) Three pistons d) No pistons
- Q.3 In a car independent suspension system following type of spring is used
 a) Leaf spring b) Coil spring
 c) Torsion bar d) Helper spring
- Q.4 Tread wear indicator is located
 a) On the tyre, where the tread meets the side wall
 b) On the dashboard of vehicle
 c) At the wheel alignment shops
 d) On the front bumper of vehicle

(1)

180352/170352/
120352/030352

- Q.5 Full form of EVS is
- a) Electric valve system
 - b) Electric volume supply
 - c) Electronic vehicle stability
 - d) None of the above
- Q.6 The term bleeding is used in _____ brakes.
- a) Hydraulic b) Mechanical
 - c) Vacuum d) Pneumatic
- Q.7 Shock absorber works on the principle of _____ friction.
- a) Fluid b) Solid
 - c) Air d) All of these
- Q.8 Tyre rotation is carried out for _____.
- a) Reconditioning of a damaged tyre
 - b) Equalizing the wear of all tyres in a vehicle
 - c) Free movement of tyres
 - d) Removing impurities from tyre
- Q.9 Which is a type of wheel?
- a) Pressed Steel disc wheels
 - b) Wire/Spoke wheel
 - c) Light alloy cast wheels
 - d) All of the above

(2)

180352/170352/
120352/030352

- Q.10 The advantages of tubeless tyre over tube tyre is
- a) Show air leakage
 - b) Better fuel efficiency
 - c) Less chances of running flat
 - d) All of the above

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Define unsprung weight.
- Q.12 EBD is termed as _____.
- Q.13 Define brake lining.
- Q.14 Mac pherson strut system is a type of _____ suspension system.
- Q.15 Define automotive safety.
- Q.16 Define tyre 'SR' speed rating.
- Q.17 Write the full form of EBD.
- Q.18 The holes in disc brake are for heat _____.
- Q.19 Write down the material used for brake shoe.
- Q.20 Define Active safety system.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain the principle of braking system.
- Q.22 Explain pneumatic suspension system.
- Q.23 Give the comparison b/w crossply & Radial ply type.
