

- Q.24 Draw layout of tractor transmission system.
- Q.25 Describe the working of three point linkage system with applications.
- Q.26 Describe the working of Power Take off shaft with figure.
- Q.27 Draw the layout of final drive of a tractor.
- Q.28 Explain the factors which affect tyre life.
- Q.29 Write the five function of Chassis Frame in tractor.
- Q.30 Explain different types to transmission boxes used in tractor.
- Q.31 Describe specification of tyre with suitable example.
- Q.32 Explain the Procedure of operator seat design.
- Q.33 Explain the Chassis less and Tractor with chassis.
- Q.34 How do you maintain maintenance on a tractor?
- Q.35 What is the role of Oil is hydraulic system. How to increase the quantity of the hydraulic oil?

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Explain layout working and application of tripper and crane.
- Q.37 Explain working and applications of Bull-Dozer with figure.
- Q.38 Explain various methods of attaching implement with tractor.

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Wheel base tractor is
- Distance between the centers of the front tyres
 - Distance between centers of the front and rear wheels
 - Distance between the centers of the rear tyres.
 - All of these
- Q.2 Differential lock in tractor is used to
- Lateral stability
 - Braking performance
 - Hydraulic lifts
 - Traction of a wheel
- Q.3 A _____ is very useful equipment and it can be used for construction work like to clear the site of work, to make the land level, etc.
- Scraper
 - excavator
 - Grader
 - Bulldozer

- Q.4 Shortening of top line of tractor three point hitch system
- Increases weight transfer on rear wheels
 - Decrease weight transfer on rear wheels
 - Increases penetration of implement
 - Decreases penetration of implement
- Q.5 One hp is equal to _____
- 246 watts
 - 250 watts
 - 746 watts
 - 1000 watts
- Q.6 When the term 'tractor' did appeared first on record in the world?
- 1973
 - 1996
 - 1890
 - 1880
- Q.7 Reduction gear is used to _____.
- Reducer speed
 - Reduce braking effort
 - Increase torque
 - Increase tyre pressure
- Q.8 How many splinters are there on a standards PTO shaft?
- 6
 - 12
 - 24
 - 36
- Q.9 The size of the bulldozer is indicated by the dimension of its _____.
- Site
 - Tyre
 - Engine
 - Blades

(2) 180362A/170362A
/120362/030362

- Q.10 It is used of transmit power when two shaft are collinear
- Gear
 - Belt
 - Clutch
 - Chai

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Write the two function hydraulic system in tractor.
- Q.12 Hydraulic oil is the life of hydraulic system in tractor. (True / False)
- Q.13 Define the tractor chassis.
- Q.14 Write the name of hydraulic that is most widely used in tractor.
- Q.15 Write the one special application of Tipper.
- Q.16 Write on Indian tractor manufacturing company full name.
- Q.17 Which type of air cleaner is used in tractor?
- Q.18 Describe draft control.
- Q.19 Internally expanding or externally _____ brake system is used in tractors.
- Q.20 Write one prime function of Motor Grader.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain double clutch system.
- Q.22 Write the application of Excavator.
- Q.23 Make a list of main tractor assemblies.
