

- Q.22 List objectives of agitation.
 Q.23 Differentiate laminar and turbulent flow.
 Q.24 Explain Grizzlies.
 Q.25 Explain concept of Bernoulli's equation.
 Q.26 Discuss wet mixing.
 Q.27 Explain batch settling tank.
 Q.28 Explain dehumidification and humidification.
 Q.29 Describe working of hammer mill.
 Q.30 Explain construction of jaw crusher.
 Q.31 List portable power driven machines
 Q.32 Explain construction of ball mill.
 Q.33 Name drying equipments. Explain any one.
 Q.34 Explain electrostatic precipitation.
 Q.35 List purposes of size reduction.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Discuss operating conditions of ball mill.
 Q.37 Describe construction and working of filter press.
 Q.38 Explain three modes of heat transfer.

No. of Printed Pages : 4 180432/120432/030432
 Roll No.

3rd Sem / Ceramic Subject:- Ceramic Industrial Operations / Unit Op. in Ceramic

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 In laminar flow fluid
 a) Layers move in straight lines
 b) Moves in zigzag motion
 c) is static
 d) None of these
- Q.2 Particle size of solids can be determined by
 a) Elutriation b) Sieving
 c) Microscope d) All of these
- Q.3 _____ is permanent installations in material conveying.
 a) Belt conveyor b) Trucks
 c) Trailors d) All of these
- Q.4 Heat transfer in solids takes place by _____ mode.
 a) Conduction b) Convection
 c) Radiation d) Both 'a' and 'c'

(1) 180432/120432/030432

- Q.5 In _____ system only energy transfer takes place
- Open
 - Closed
 - Isolated
 - Surroundings
- Q.6 Hardness is the resistance to _____ offered by a material.
- Scratching
 - Crack
 - Corrosion
 - All of these
- Q.7 _____ machine is used for fine size reduction.
- Ball mill
 - Jaw crusher
 - Gyratory crusher
 - Dodge crusher
- Q.8 Units of density
- kg/m^3
 - g/ml
 - Kg/L
 - All of these
- Q.9 In which of the following system both energy and mass transfer takes place
- open
 - closed
 - Isolated
 - Surroundings
- Q.10 System consists of more than one phase is called a
- Homogeneous system
 - Heterogeneous system
 - Open system
 - Adiabatic

(2) 180432/120432/030432

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Specific gravity is the ratio of density of _____ to density of some given reference material.
- Q.12 Particle size can be determined with the help of ball mill. (True/False)
- Q.13 Unit of specific weight is _____
- Q.14 Rotary drum filters can be used to separate solids from liquids. (True/False)
- Q.15 Drying rate depend on _____. (Humidity/Pressure)
- Q.16 In liquids heat transfer takes place by _____.
- Q.17 Universe consists of system and surroundings. (True/False)
- Q.18 The sum of internal energy and pressure volume product is known as _____.
- Q.19 The system in which there is exchange of heat and mass is called _____.
- Q.20 In homogeneous system the composition is not uniform throughout the system. (True/False)

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 How will you estimate drying rate? Explain

(3) 180432/120432/030432
