

- Q.26 Discuss the classification of pigments used in paint industry.
- Q.27 Mention any five advantages of water based paint over solvent based paint.
- Q.28 Write short note on Lacquers.
- Q.29 Explain in brief spray coating and dip coating techniques of paint application.
- Q.30 Explain in brief sagging and skinning paint defect.
- Q.31 Differentiate between electrochemical cell and electrolytic cell.
- Q.32 Define electroplating and discuss the quantitative aspects of electrolysis.
- Q.33 Explain in brief blistering and cracking paint defect.
- Q.34 Explain in brief pigment volume concentration and solid content.
- Q.35 Write short note on special purpose coating.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain in detail paint manufacturing process along with the flow sheet.
- Q.37 Discuss in detail any five methods of cleaning articles before electro deposition.
- Q.38 Write short notes on any two of following:
- Causes of paint failure
 - Powder coating
 - OEM paints
 - Pug mill

No. of Printed Pages : 4 180565/120565/030554A
Roll No.

6th Sem / Chemical Engineering Sub : Paint Technology

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Semi transparent coating tinted with pigment, applied on a previously painted surface.
- Glaze
 - Lake
 - Tonar
 - Vehicle
- Q.2 Dough like material consisting of pigment and vehicle.
- Printing ink
 - Putty
 - Stain
 - Sealer
- Q.3 Which of the following mill contains two S-Shaped intermeshing blades.
- Pug mill
 - Ball Mill
 - Roll mill
 - Pebble mill
- Q.4 Which of the following is a natural binder
- Alkyds
 - Polyesters
 - Linseed oil
 - Vinyls

(1) 180565/120565/030554A

- Q.5 Which of the following is oil based paint
- Acrylic paint
 - Alkyd paint
 - Latex paint
 - None of these
- Q.6 Which of the following is inorganic white pigment?
- Zinc chromate
 - Lead chromates
 - China clay
 - Titanium dioxide
- Q.7 Which of the following is red inorganic pigment.
- BON red
 - Barium lithol red
 - Red Iron oxide
 - Toluidine red
- Q.8 Full form of VOC is
- Volatile organic compound
 - Versatile organic compounds
 - Volatile oxygen content
 - Volatile oxygen compound
- Q.9 Failure of paint due to passage of time is called
- Blooming
 - Cracking
 - Bleeding
 - Aging
- Q.10 Percentage of pigment volume in the total volume of solids in the paint is called
- Pigment Volume concentration
 - Solid content
 - Pigment to binder ratio
 - None of these

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Name any two binders used for thermoplastic Powder coating.
- Q.12 Write full form of OEM coating.
- Q.13 Name the paint defect in which minute holes are formed in the dry film coating.
- Q.14 Name a yellow pigment used in paint industry.
- Q.15 Name the type of cell in which chemical energy is converted into electrical energy.
- Q.16 Write the formula of Refractive index.
- Q.17 Name a chemical used in flame retardant paint.
- Q.18 Name any two additives used in paint.
- Q.19 Define pigment to binder ratio.
- Q.20 Define Bleeding.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain in brief the need of surface coating.
- Q.22 Explain in brief hiding power and light fastness properties of pigment.
- Q.23 Discuss the use of corrosion inhibitors and Biocides additives in Paint formulation.
- Q.24 Explain the working of roller mill with help of neat diagram.
- Q.25 Explain in brief hydrocarbon solvent and oxygenated solvent.
