

- Q.26 Where & why folding endurance of paper is important?
- Q.27 What are the sources of ash in paper?
- Q.28 How basis weight of paper is controlled on the paper machine?
- Q.29 Write a note on condenser paper.
- Q.30 List various type of coating process.
- Q.31 What are the important electrical properties for a good electrical insulating paper?
- Q.32 Mention any five parameter why coating of paper is important?
- Q.33 Write the application of wax paper.
- Q.34 State any five uses of toilet tissue.
- Q.35 Briefly describe the defect of paper.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Define porosity of paper. How porosity is measured? Explain with neat diagram.
- Q.37 List various optical properties of paper. Explain each in detail.
- Q.38 Write short notes on any two of the following
- Photo graphic paper
 - Colour Reversion
 - Stress strain curve of paper

(20) (4) 180666/120666/030666

No. of Printed Pages : 4 180666/120666/030666
Roll No.

6th Sem / Chemical (P&P) Sub : Paper Properties & Conversion

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Which property of paper is affected by orientation of fiber in paper machine?
- Basis weight of paper
 - Density of Paper
 - Tearing strength of paper
 - All of the above
- Q.2 In which direction tearing strength of paper is more?
- Wire direction
 - Felt direction
 - Machine direction
 - Cross direction
- Q.3 Choose which affect the density of paper?
- Rosin
 - Fillers
 - Both A & B
 - None
- Q.4 Which property (in bag paper) is important to be filled by valve connection?
- Basis weight
 - Thickness
 - Density
 - Porosity

(1) 180666/120666/030666

- Q.5 What is the unit of brightness?
 a) Percentage b) Meter
 c) Kilogram d) None
- Q.6 How much time is required for determination of moisture content of paper?
 a) 4 hrs b) 3 hrs
 c) 2 hrs d) 1 hr
- Q.7 Reciprocal of the amount of light transmission is called _____?
 a) Brightness b) Opacity
 c) Gloss d) None
- Q.8 Which type of paper should have low ash content?
 a) Writing paper b) Printing paper
 c) Condenser paper d) Wax paper
- Q.9 In which year the first paper coated on two sides was made?
 a) 1875 b) 1885
 c) 1895 d) 1900
- Q.10 What makes toilet paper special?
 a) Shorter fiber b) Longer fiber
 c) Artificial fiber d) All of the above

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Expand the term BSF.

- Q.12 Which property of paper is affected by the orientation of fiber in paper machine?
- Q.13 Define machine direction.
- Q.14 What is the unit of density?
- Q.15 Name the instrument used for measuring the tearing resistance of paper.
- Q.16 In which type of paper opacity is important?
- Q.17 What is the effect of moisture content on basis weight of paper?
- Q.18 Where electrical paper is used?
- Q.19 What is ash?
- Q.20 Which coating of paper on machine or off machine is expansive?

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Why orientation of fiber in paper machine is important?
- Q.22 Define wire side & felt side of paper.
- Q.23 Draw neat sketch of quadrant type instrument for measuring basis weight of paper.
- Q.24 Write a note on breaking length.
- Q.25 What is the greatest cause of rejection of paper? Explain.
