

- Q.25 Write a short note on paver blocks and interlocking tiles.
- Q.26 Describe briefly about setting of the cement.
- Q.27 Enlist the name of various Laboratory test on cement. Describe any one.
- Q.28 Give five characteristics of good timber.
- Q.29 Enlist the name of various methods of timber sawing. Describe any one.
- Q.30 What is a paint. What are the main ingredients of an oil paint? Describe the functions of each.
- Q.31 Write short notes on Distempers.
- Q.32 Describe any two properties and uses of
a) Cast iron b) Wrought iron
- Q.33 Differentiate between homogenous and heterogeneous plastics.(Any five)
- Q.34 What is gypsum? Write its uses.
- Q.35 Write a short note on eco-friendly building materials used in construction.

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Explain the working of Bulls trench kiln for the burning of bricks with the help of a neat sketch.
- Q.37 What are the main constituents of Portland cement? Explain the function of each.
- Q.38 Explain the various methods of seasoning in details.

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Marble is an example of:
a) aqueous rocks b) metamorphic rocks
c) sedimentary rocks d) igneous rocks
- Q.2 The dressing of stone is done:
a) immediately after quarrying
b) after seasoning
c) after three months of quarrying
d) just before building
- Q.3 Excess of silica in the clay:
a) makes the brick brittle and weak
b) makes the brick crack and warp on drying
c) changes the colour of the brick from red to yellow
d) improves impremeability and durability of the brick
- Q.4 The bricks should be burnt at temperature form:
a) 300°C to 500°C b) 500°C to 800°C
c) 800°C to 1000°C d) 1000°C to 1200° C

- Q.5 The initial setting of cement is caused due to
- Di-calcium silicate
 - Tri-calcium silicate
 - tri-calcium aluminate
 - tri-calcium alumino ferrite
- Q.6 The final setting of ordinary cement should not be more than
- 2 hours
 - 4 hours
 - 8 hours
 - 10 hours
- Q.7 The purpose of seasoning of timber is to
- change the direction of grain
 - remove voids
 - reduce moisture content
 - all of these
- Q.8 The liquid part of the paint is called
- pigment
 - vehicle
 - solvent
 - drier
- Q.9 Carbon content in steel is
- 0.15% to 1.5 %
 - 2-4%
 - below 0.15%
 - below 0.01%
- Q.10 Which of the following materials is used as a reinforcing material in concrete ?
- Limestone
 - Steel
 - Sand
 - Gravel

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Rocks formed by solidification of lava are known as _____
- Q.12 The dimensions of a standard bricks are _____
- Q.13 For Preforming compressive strength test of cement the size of cube mould used should be _____
- Q.14 Annual rings represent _____ of the tree.
- Q.15 The thinner used for oil paints is _____
- Q.16 Purest form of commercial iron is _____
- Q.17 Preservation of timber _____ the age of timber.
- Q.18 The common proportion of silica in ordinary portland cement is _____
- Q.19 The rock which is alumina is the main constituent is called _____
- Q.20 Paint saves the steel structures from _____

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Enlist any five uses of stones.
- Q.22 Define a quarry and mention the factors to be considered while making a selection for its site.
- Q.23 What are the constituents of good brick earth?
- Q.24 Write a short notes on:
- Tempering
 - Ground moulded bricks
