

- Q.26 Differentiate between corrective maintenance and preventive maintenance. (any five)
- Q.27 Describe different purposes of investigations for building defects.
- Q.28 Write the importance of visual examination for diagnosis of building defects.
- Q.29 Write the process of application of joint sealants as a repair material.
- Q.30 Describe the factors affecting durability of repaired elements.
- Q.31 Describe the effect of various deterioration agencies on brick masonry.
- Q.32 Describe the process of determination of strength of concrete using UPV Test.
- Q.33 Describe the defects caused by the dampness in buildings.
- Q.34 Describe the importance of compatibility of repair materials with original constructions.
- Q.35 Describe the defects caused physical movements due to forces in building elements.

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Explain the dry packing technique for repairs of small confined areas with its advantages and disadvantages.
- Q.37 Enlist the name of various water proofing system. Explain any one of them with their characteristics.
- Q.38 Explain the process of determination of strength of concrete using rebound hammer test.

5th Sem / Civil, Brick Tech., Constr. Mgmt. Sub : Repair & Maintenance of Buildings

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Which IS code gives details about termite proofing?
a) IS 6313 b) IS 5668
c) IS 5886 d) IS 6835
- Q.2 To control corrosion, concrete with _____ is used
a) More cement content
b) More coarse aggregates
c) Low thermal coefficient
d) Low permeability
- Q.3 The repair and rehabilitation on damaged or spalled concrete is done by removing the _____
a) Breakage b) Collapsing
c) Loose concrete d) Bonding
- Q.4 One of the testing equipment used for inspection is _____
a) Test tubes b) Measuring jar
c) Strain gauges d) None of these
- Q.5 Which defect occurs if paint is excessively thick?
a) Wrinkling b) Grinning
c) Flaking d) All of these
- Q.6 In which of the following method of repair of crack, the concrete is applied with certain pressure?
a) Stitching b) Epoxy injection
c) Shortcrete/Guniting d) Grooving & sealing

- Q.7 The crack width more than _____ mm is called as large or major crack.
 a) 1mm b) 2mm
 c) 5mm d) 10mm
- Q.8 In honeycomb method, the water-cement ratio is _____.
 a) 0.25 b) 0.30
 c) 0.33 d) 0.35
- Q.9 Core testing and sampling method is used to measure _____.
 a) Density b) Strength
 c) Permeability d) All of these
- Q.10 For the purpose of repair of crack, the crack is cut in which of the following shape _____.
 a) C b) D
 c) U d) V

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Building maintenance is the act of maintaining the buildings in _____ conditions. (Serviceable / Un-Serviceable)
- Q.12 The depth of carbonation _____ with age. (Decrease / Increase)
- Q.13 The narrow gap provided for accommodating sufficient movement of pipes is called _____ (fillet joint / butt joint)
- Q.14 Electrolytic corrosion is due to contact between a metal and _____ (Rubber / Non-metal)
- Q.15 Water seal of a trap is the _____ vertical distance between the weir crest of the trap and the minimum normal inside water level. (Maximum / Minimum)

(2)

180755A

- Q.16 A flat roof is _____ prone to leakage as it undergoes movements due to variation in temperature, moisture, loading or other causes. (Less / More)
- Q.17 Trowel applied technique can be used for horizontal, vertical or overhead repair areas which are less than _____ mm deep with little to no reinforcing steel. (25cm / 25 mm)
- Q.18 Joints in a building structure may be defined as a _____ in the component located in a predetermined position between either similar or dissimilar materials. (Continuity / Discontinuity)
- Q.19 The outlet from the tanks should always be provided with anti-syphonage pipe to avoid _____ (Air locking / Air releasing)
- Q.20 A good trap should normally run for _____ lakh operations of turning on and turning off. (Ten lakh / One lakh)

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Write the main causes of defects in building elements and describe any one of them.
- Q.22 Describe the "Form Tie Holes" process of repair of surface defects.
- Q.23 Write the classifications of the processes of deterioration and describe any one of them.
- Q.24 List the various types of problems to which overhead and underground water tank suffers.
- Q.25 Write any five objectives of maintenance.
