

- Q.28 Explain Deadlock detection.
 Q.29 Explain the concept of swapping in memory.
 Q.30 What is Demand paging? Explain.
 Q.31 Write any four Virtual memory advantages.
 Q.32 Explain I/O devices in detail.
 Q.33 Differentiate between Buffering and Spooling.
 Q.34 What are the necessary conditions for deadlock?
 Q.35 Write any five Linux commands with examples.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain process management and scheduling.
 Q.37 Explain deadlocks and their solutions.
 Q.38 Explain file management and I/O management.

No. of Printed Pages : 4
 Roll No.

180831/170831/

3rd Sem / Computer Engg., IT, GE Sub : Operating System

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Interface between user and OS is
 a) Kernel b) Shell
 c) BIOS d) CPU
- Q.2 CPU scheduler selects process from
 a) Disk b) Ready queue
 c) File d) Printer
- Q.3 SJF means
 a) Short Job First b) Simple Job File
 c) Shortest Jump First d) System Job First
- Q.4 Semaphore is used for
 a) Synchronization b) Compilation
 c) Memory d) Editing
- Q.5 Number of deadlock conditions
 a) 2 b) 3
 c) 4 d) 5

(700)

 120831/030831

(1)

180831/170831/
 120831/030831

- Q.6 Swapping transfers process between
a) RAM & DISK b) CPU & Cache
c) Disk & Printer d) Files

- Q.7 Page fault occurs when page is not in
a) CPU b) Cache
c) Main memory d) Printer

- Q.8 Spooling is mainly used for
a) CPU b) Memory
c) Printer d) ROM

- Q.9 Command to delete file
a) rm b) cp
c) mv d) Is

- Q.10 Directory stores
a) Registers b) Files & Folders
c) CPU data d) Cache

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 The core part of an operating system is called the _____.
Q.12 The Linux command used to remove a file is _____.
Q.13 _____ scheduling gives each process a fixed time slice.

(2) 180831/170831/
120831/030831

- Q.14 A _____ device is used to display output on the screen.
Q.15 The command used to change directory in Linux is _____.
Q.16 An operating system acts as an interface between user and hardware. (True / False)
Q.17 Deadlock improves system performance. (True / False)
Q.18 RAM is a secondary memory. (True / False)
Q.19 Paging helps in reducing external fragmentation. (True / False)
Q.20 The PWD command shows the current working directory. (True / False)

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain OS services.
Q.22 What are System calls? Explain.
Q.23 Explain Process life cycle in detail?
Q.24 Write the advantages of multiprogramming.
Q.25 What is Priority scheduling?
Q.26 Explain Critical section problem.
Q.27 Differentiate between Single user and multiuser operating system.
