

- Q.23 Explain data representation.
- Q.24 Describe analog signals.
- Q.25 Describe digital signals.
- Q.26 Explain bandwidth and latency.
- Q.27 Explain digital to digital conversion.
- Q.28 Explain digital to analog conversion.
- Q.29 Write short note on PCM and DM.
- Q.30 Explain multiplexing with example.
- Q.31 Describe coaxial cable.
- Q.32 Describe radio wave transmission.
- Q.33 Describe microwave communication.
- Q.34 Explain parity check method.
- Q.35 Explain CRC method.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain analog and digital signals with comparison.
- Q.37 Explain multiplexing techniques (FDM, TDM, WDM).
- Q.38 Explain types of transmission media with advantages and disadvantages.

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 WAN Covers
 - a) Small area
 - b) Building
 - c) city
 - d) Large geographical area
- Q.2 Microwave is
 - a) Guided
 - b) Wired
 - c) Unguided
 - d) Optical
- Q.3 Signal impairment includes
 - a) Noise
 - b) Speed
 - c) Color
 - d) Format
- Q.4 Delta Modulation is
 - a) Analog to Digital
 - b) Digital to Analog
 - c) Storage
 - d) Routing

(500) (4) 180835/170835/

(1) 180835/170835/
120835/030835

- Q.5 Coaxial cable is
- | | |
|-----------------|--------------|
| a) Wireless | b) Guided |
| c) Optical only | d) Satellite |
- Q.6 Throughput means
- | |
|--------------------------|
| a) Delay |
| b) Speed of transmission |
| c) Noise |
| d) Loss |
- Q.7 WDM is used in
- | | |
|-----------|--------------|
| a) Copper | b) Fiber |
| c) Radio | d) Telephone |
- Q.8 CRC is used for
- | | |
|-----------------|--------------------|
| a) Compression | b) Error detection |
| c) Multiplexing | d) coding |
- Q.9 Infrared is
- | | |
|-------------|-----------|
| a) Wired | b) Guided |
| c) Wireless | d) Fiber |
- Q.10 PCM is used for
- | | |
|-----------------|------------|
| a) Audio coding | b) Storage |
| c) Display | d) Routing |

(2) 180835/170835/
120835/030835

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 WAN connects computers over a large geographical area. (True / False)
- Q.12 Noise improves signal quality. (True / False)
- Q.13 PSK stands for Phase Shift Keying. (True / False)
- Q.14 Microwave is an example of guided media. (True / False)
- Q.15 TDM Allows multiple signals to share the same channel by time slots. (True / False)
- Q.16 Data communication requires sender, receiver, message and _____.
- Q.17 Transmission impairment due to loss of strength is called _____.
- Q.18 Co-axial cable is a type of _____ media.
- Q.19 DM stands for _____ Modulation.
- Q.20 Error detection using extra bits is called _____.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain advantages of networking.
- Q.22 Explain network criteria.
