

Q.32 What is the difference between built-in and user-defined functions? Give an example of each type of function.

Q.33 Explain strlen () function by giving suitable example.

Q.34 Define variable. How it is declared? Give example.

Q.35 What is the purpose of Break statement? Explain with example.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

Q.36 Explain data types and its various types available in 'C'.

Q.37 Write a program to compare two strings

Q.38 Define operator. Explain in detail the different operators available in C.

No. of Printed Pages : 4

Roll No.

3rd Sem / Comp. / Mechtronics

Subject:- Programming in C

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

Q.1 Which of the following is not a keyword in 'C'.

- a) int b) char
c) Include d) float

Q.2 Which of the following is a valid identifier in 'C'

- a) 2nd name b) # name
c) -name d) none of the above

Q.3 The operator & is an example of _____ operator

- a) logical b) arithmetic
c) relational d) assignment

Q.4 String constant should be enclosed between

- a) Single quotes b) Double quotes
c) both a and b d) none of these

Q.5 Which function is used to find the length of a string?

- a) Strncpy b) strlen
c) strrev d) strnstr

- Q.6 What is the purpose of printf function in 'C'
a) To read input b) To print output
c) To perform scanning d) To control program
- Q.7 % is used to represent which data type?
a) char b) float
c) double d) int
- Q.8 Which keyword is used for declaration of union?
a) uni b) union
c) struct d) none of these
- Q.9 Which header file includes getch () function?
a) conio.h b) stdio.h
c) string.h d) output.h
- Q.10 In C, size of a float variable is _____ bytes.
a) 2 b) 4
c) 8 d) 6

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 C is a _____ Language.
- Q.12 What is an algorithm?
- Q.13 Name any two keywords used in C language.
- Q.14 Write the syntax of do-while loop.
- Q.15 Define array.

(2) 180836/170836/082435

- Q.16 Define constant.
- Q.17 Write any two unary operators used in C language.
- Q.18 Name one data type in C.
- Q.19 Define variable.
- Q.20 Define structure.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain different steps in development of a program.
- Q.22 Write an algorithm to find the sum of two numbers.
- Q.23 Differentiate between Global and Local variables.
- Q.24 What is the use of getchar () and Putchar () function?
- Q.25 Explain if-else statement with example.
- Q.26 Write a C program to find whether a number is even or not.
- Q.27 Differentiate between while and Do while loop.
- Q.28 List various relational operator available in 'C' programming.
- Q.29 Differentiate between structure and union.
- Q.30 Define array. What are the advantages of using array.
- Q.31 Explain the basic structure of C program.

(3) 180836/170836/082435
