

- Q.5 The DBMS acts an interface between _____ and _____ of an enterprise-class system.
- Database application and the database
 - Application and SQL
 - Data and the DBMS
 - The user and the software
- Q.6 Which of the following key is required to handle the data when the encryption is applied to the data so that the unauthorized user cannot access the data?
- Primary key
 - Authorized key
 - Encryption key
 - Decryption key
- Q.7 Which command is used to remove a relation from an SQL?
- Drop table
 - Delete
 - Purge
 - Remove
- Q.8 A table is in 3NF if it is in 2NF and if it has no _____
- Functional Dependencies
 - Transitive Dependencies
 - Trivial Functional Dependency
 - Multivalued Dependency
- Q.9 Which of the following enables us to view data from the table based on specific criterion
- Form
 - Query
 - Macro
 - Report

- Q.10 What is the primary goal of normalization in database design?
- to enforce referential integrity
 - to facilitate data encryption
 - to improve data retrieval performance
 - To eliminate data redundancy

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 What do you understand by DBA?
- Q.12 What is normalization?
- Q.13 DDL stands for _____
- Q.14 List one components of ER Model.
- Q.15 What is superkey?
- Q.16 Define tuple.
- Q.17 What is the use of SQL Select statement ?
- Q.18 Write syntax of CREATE INDEX command.
- Q.19 Name various types of joins.
- Q.20 Explain REVOKE command

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 What is DBMS? Write down its advantages.
- Q.22 Write short note on the role of DBA.
- Q.23 Compare and contrast the Hierarchical and Network database models
