

- Q.5 ALE signal in 8085 is used for:
- Address latch enable
 - Arithmetic logic execution
 - Instruction decoding
 - None
- Q.6 The stack in 8085 works on principle of:
- FIFO
 - LIFO
 - Random
 - Direct access
- Q.7 The clock frequency of 8085 is usually:
- 1 MHz
 - 2 MHz
 - 6 MHz
 - 3 MHz
- Q.8 The HL pair in 8085 can be used as :
- Data pointer
 - Stack pointer
 - Program counter
 - Instruction register
- Q.9 The instruction HLT is used to:
- Hold accumulator data
 - Stop execution
 - Halt only memory
 - Halt stack
- Q.10 The memory unit of a microprocessor stores:
- Only data
 - Only instructions
 - Both data and instructions
 - None

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Write name of different types of system buses?
- Q.12 Define Flag.
- Q.13 What is the purpose of Instruction Register?
- Q.14 Name the addressing mode used in the instruction MOVA,B.
- Q.15 What do you understand by mnemonics?
- Q.16 Name the two schemes used for connecting I/O devices with microprocessor.
- Q.17 What is maskable interrupt?
- Q.18 In 8255 PPI, the PPI stands for _____
- Q.19 Which interrupt is not level sensitive in 8085?
- Q.20 What is the bit size of 8086 microprocessor?

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 List the various applications of microprocessors.
- Q.22 Differentiate between memory mapped I/O and I/O mapped I/O.
- Q.23 What is Stack? What is the function of stack pointer? Explain PUSH and POP operation.
- Q.24 Differentiate between machine language and assembly language.
- Q.25 Elaborate instruction formats and its types.
- Q.26 Write an assembly program to increment a number by 1.
