

- Q.24 Differentiate between hardwired control and micro programmed control.
- Q.25 Write a short note on DMA.
- Q.26 Define CISC in brief.
- Q.27 Differentiate between Programmed I/O and interrupt initiated I/O.S
- Q.28 Write a short note on MIMD.
- Q.29 Explain Stack organisation of CPU.
- Q.30 Write a short note on Virtual memory.
- Q.31 Differentiate between direct and indirect addressing modes.
- Q.32 What is pipelining? Explain.
- Q.33 Write a short note on secondary memory.
- Q.34 What is multiprocessors? Explain.
- Q.35 What are the functions of BIOS?

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain various mode of data transfer in detail.
- Q.37 Explain various instruction format in detail.
- Q.38 Write characteristics and differences of RISC and CISC.

4th Sem / Comp. IT Subject:- Computer Organization

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 RISC stands for ?
- Reduced instruction set computer
 - Relax instruction set computer
 - Random instruction set computer
 - None of the mentioned
- Q.2 ALU stands for_____
- Arithmetic Legal unit
 - Arithmetic Logical unit
 - Arithmetic Lower unit
 - None of the mentioned
- Q.3 Computer memory that's used to store information based on its contents is called
- Primary Memory
 - RAM
 - Associative Memory
 - None of the above
- Q.4 Which part of the computer is used for calculation
- RAM
 - ROM
 - CU
 - ALU

(1) 180845/170845/120845
/030845/031065B

- Q.5 What are the various part of CPU
 a) ALU b) CU
 c) MU d) All of them
- Q.6 ROM stands for
 a) Read once memory
 b) Random only memory
 c) Read only memory
 d) None of the above
- Q.7 Primary memory is also known as
 a) main memory b) Secondary memory
 c) Auxiliary memory d) Access memory
- Q.8 SISD stands for
 a) Single instruction single data
 b) Simple instruction single data
 c) Single instruction simple data
 d) None of the above
- Q.9 Cache memory lies between
 a) CPU and main memory
 b) CPU and secondary memory
 c) Secondary and main memory
 d) None of the above
- Q.10 DMA stands for
 a) Depend memory access
 b) Direct memory access
 c) Direct main access
 d) All of the above

(2) 180845/170845/120845
 /030845/031065B

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 What is Main memory?
- Q.12 Expand MISD
- Q.13 Expand BIOS.
- Q.14 In memory hierarchy, as the speed of the operation decreases the memory size also decrease. (True/False)
- Q.15 Which part of the computer is used for controlling all the activities in a computer? (ALU/CU)
- Q.16 _____ in an output device function in C. (keyboard /Printer)
- Q.17 Write full form of CISC.
- Q.18 List two addressing modes.
- Q.19 Give one example of zero address instruction.
- Q.20 Define POST.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 What are the various parts of CPU? Explain.
- Q.22 Explain Control Word.
- Q.23 What is memory hierarchy? Explain with diagram.

(3) 180845/170845/120845
