

- Q.24 What is topology? What are its types?
- Q.25 Briefly explain the function of PING, IPCONFIG and NETSTAT.
- Q.26 Differentiate between Bridges & Repeaters.
- Q.27 Explain in brief the loop back concept.
- Q.28 Distinguish between Logical and Physical addressing with five points.
- Q.29 Draw the IPV4 header and explain in brief the functions of each field.
- Q.30 Briefly explain IEEE 802.11.
- Q.31 How Coaxial cable and twisted pair cable differ from each other? Write the differences in five points.
- Q.32 Differentiate between LAN, MAN, WAN.
- Q.33 What is IP addressing? Explain the IP Address format.
- Q.34 Explain various classes used in IP addressing?
- Q.35 Differentiate between IPv4 & IPv6.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain OSI reference model with diagram in detail.
- Q.37 Explain different classes of IP addressing.
- Q.38 Write short note on :
- a) Bluetooth b) WiMax.

(680) (4) 180851/170851/
120851/030851

No. of Printed Pages : 4

Roll No.

5th Sem / Computer Engg. Sub : Computer Networks

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Computer Network is _____
- a) Collection of hardware components and computers
- b) Interconnected by communication channels
- c) Sharing of resources and information
- d) All of the above
- Q.2 IEEE 802.11 standard is for _____
- a) Wireless LAN b) Bluetooth
- c) Wi-fi d) Wi-Max
- Q.3 Wi-Fi stand for _____
- a) Wireless function b) Wireless fidelity
- c) Wireless functioning d) None of above
- Q.4 A device that connects networks with different protocols is _____
- a) Switch b) HUB
- c) Gateway d) Proxy Server

(1) 180851/170851/
120851/030851

a) 40 b) 20
c) 10 d) 8

a) RFC b) Server
c) Standard d) Protocol

a) Distributed device b) Centralized device
c) Open source device d) Wireless device

a) Presentation layer b) Network layer
c) Session layer d) Transport layer

a) 12.0.01 b) 168.172.19.39
c) 172.15.14.36 d) 192.168.24.43

a) Ping b) Netstat
c) Hacking d) Ipconfig

Note: Objective type questions. All questions are compulsory. (10x1=10)

Q.12 The first layer from top in OSI model is _____.

Q.14 WLAN stands for _____.

Q.16 PING command displays network connections.
(True/False)

Q.18 In TCP/IP model, IP address is of how many bytes?

Q.20 Full form of ISDN is _____.

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

Q.22 Explain any five types of network connectivity devices.

Q.23 Write five differences between OSI and TCT / IP reference models?
