

- Q.26 What are major reasons for data leak?
- Q.27 Elaborate legal issues in cloud computing.
- Q.28 What are various challenges (any five) in implementing cloud storage?
- Q.29 Differentiate between public and private cloud models.
- Q.30 What is cloud computing? What makes it more reliable?
- Q.31 What do you mean by S, E, O in cloud scheduling?
- Q.32 Write any five applications of cloud computing with examples.
- Q.33 Define Virtualization. Write at least five advantages of Virtualization.
- Q.34 Explain any five issues related to infrastructure security in cloud computing.
- Q.35 Compare SLA (Service Level Agreement) and SLM (Service Level Management)

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 What are the characteristics of cloud computing? How cloud computing increases business of IT companies?
- Q.37 Discuss various cloud service models with their advantages and disadvantage.
- Q.38 Define Cloud Scheduling. Explain various types of Cloud scheduling.

No. of Printed Pages : 4

180854A/170854A

Roll No.

5th Sem / Comp. Sub : Cloud Computing

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 In scheduling, MLFQ is :
- Multiple level from Queue
 - Multi level full Queue
 - Multiple level full Queue
 - Multi level feedback Queue
- Q.2 Which cloud model is a combination of private and public cloud?
- Service
 - Community
 - Hybrid
 - Private
- Q.3 GCE stands for
- Good compute Engine
 - Good Compute Engine
 - G-mail Compute Engine
 - None of the above
- Q.4 AWS stands for
- Apple Web Services
 - Architecture Web Services
 - Amazon Web Services
 - Advantage Web Services

- Q.5 Server, operating system, virtual Machines comes under which service model?
 a) IaaS b) PaaS
 c) SaaS d) IaaS
- Q.6 Which one of the following is a kind of technique that allows sharing the single physical instance of an application or the resources among multiple customers?
 a) Virtualization
 b) Service oriented architecture
 c) Grid computing
 d) Utility computing
- Q.7 Which of the following service is provided by google for online storage?
 a) Drive b) Sky drive
 c) Drop box d) All of the mentioned
- Q.8 Which of the following are the features of cloud computing?
 a) Security
 b) Availability
 c) Large network access
 d) All of the mentioned
- Q.9 Which of the following is not a property of cloud computing?
 a) Virtualization b) Scalability
 c) Composability d) All of the mentioned
- Q.10 SMTP stands for
 a) Software Mail Transfer Pipe
 b) Service Mail Transfer Protocol
 c) System Mail Total Protocol
 d) Simple Mail Transfer Protocol

(2) 180854A/170854A

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Write any two disadvantages of cloud computing?
- Q.12 SLA stands for _____.
- Q.13 Data intensive applications on cloud requires high network bandwidth. (T/F)
- Q.14 Define SAN.
- Q.15 _____ software is used in creation of Virtual Machines.
- Q.16 Give one disadvantage of dynamic scheduling?
- Q.17 PaaS _____.
- Q.18 _____ means the application on one platform should be able to incorporate services from the other platform.
- Q.19 Cloud computing is a kind of abstraction based on the notion of combining physical resources and represents them as _____ resources to users.
- Q.20 Name two categories of cloud scheduling.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain the history of cloud computing?
- Q.22 What is the Purpose of a service level agreement (SLA)?
- Q.23 What do you mean by virtual machine migration? Explain its various types.
- Q.24 Write any five benefits and challenges in Cloud storage.
- Q.25 Explain various interface and API hacking threats to cloud computing.
