

- Q.28 Describe the significance of the Shuffle phase in the MapReduce process.
- Q.29 Explain Pig Data flow engine.
- Q.30 How Hive is different from traditional RDBMS?
- Q.31 Explain arrays in R.
- Q.32 What is the purpose of Data frames in R?
- Q.33 Explain the taxonomy of Big data.
- Q.34 Explain Apache Hadoop and Hadoop ecosystem.
- Q.35 What are the disadvantages of Distributed File System over Big Data.

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 What is Big Data? What are the top 8 industries using Big Data?
- Q.37 What is map reduce? Describe the MapReduce execution steps with neat diagram.
- Q.38 Explain Pig. List various used of PIG. Also give four differences between Pig and Hive.

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 What does the term "3 Vs" refer to in big data?
- Value, variety, Velocity
 - Volume, Velocity, Variety
 - Volume, Verification, Velocity
 - Volume, Variety, Veracity
- Q.2 Which of the following is a common use case for big data analytics?
- Predictive analytics
 - Text editing
 - Word processing
 - Video games
- Q.3 What is Hadoop primarily used for?
- Web development
 - Data storage and processing
 - Graphic design
 - Desktop publishing
- Q.4 What is the default replication factor for HDFS?
- 1
 - 2
 - 3
 - 4

Q.5 Which of the following is NOT a phase in Map Reduce?

- a) Mapphase b) Shufflephase
- c) Load phase d) Reduce phase

Q.6 What data structure is primarily used to represent data in Map Reduce?

- a) Data Frame b) Key Value Pair
- c) Table d) JSON

Q.7 What does the Hive Metastore do

- a) Store actual data
- b) Manage Metadata about tables
- c) Execute queries
- d) Load data

Q.8 Which of the following is NOT a type of table in Hive?

- a) Managed table b) External table
- c) Temporary table d) Distributed table

Q.9 Which function is used to read CSV files into R?

- a) Read.table() b) Read.csv()
- c) import.csv() d) load.csv()

Q.10 Which R package is designed for fast data manipulation on large datasets?

- a) dplyr b) ggplot2
- c) plotly d) shiny

(2) 180854B/170854B

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

Q.11 Who created Hadoop?

Q.12 Define Big Data analytics.

Q.13 What is a data lake?

Q.14 What does ETL stand for ?

Q.15 HDFS stands for _____.

Q.16 What command is used to copy files to HDFS?

Q.17 What does YARN stand for in the context of Hadoop?

Q.18 Define Hive.

Q.19 What are the two main components of Pig?

Q.20 Name two industries using Big Data.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

Q.21 What is Hadoop and Hadoop vendors?

Q.22 What are the characteristics of Big Data?

Q.23 Write any five applications of Big Data.

Q.24 Explain how Hadoop cluster works?

Q.25 Differentiate between job tracker and task tracker daemons of Hadoop.

Q.26 What does the Map function do in a MapReduce job?

Q.27 Explain the relationship between MapReduce and the Hadoop ecosystem.
