

- Q.22 Explain the power generation by Geothermal energy.
 Q.23 Explain the working of micro hydro power plants.
 Q.24 Write a short note on Geothermal energy sources.
 Q.25 Explain the working principal of fuel cell.
 Q.26 Write a short note on Ocean thermal energy conversion.
 Q.27 What is the principle of MHD power generation?
 Q.28 What are different types of windmills?
 Q.29 Explain working of solar cooker?
 Q.30 What are the various applications of fuel cell?
 Q.31 Explain tidal energy.
 Q.32 What are the various applications of solar energy?
 Q.33 Compare open and closed cycle in OTEC.
 Q.34 Write the principle of solar heat conversion.
 Q.35 Write various applications of solar energy.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain solar energy applications with diagram.
 Q.37 Explain wind energy conversion system and electricity generation.
 Q.38 Describe fuel cells design, working and applications

No. of Printed Pages : 4

Roll No.

180932/170955/

030954B/105854

3rd Sem / Electrical

Sub : Non Conventional Sources of Energy/ Non-Conventional Energy Sources/ Energy Sources & Management

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Primary energy example is:
 a) Electricity b) Coal
 c) Petrol d) Steam
- Q.2 Non-Conventional energy source is:
 a) Coal b) Solar
 c) Diesel d) Gas
- Q.3 Solar cell converts:
 a) Heat to electricity
 b) Electricity to heat
 c) Wind to heat
 d) Sunlight to electricity
- Q.4 Gasifiers are used in:
 a) Wind energy b) Solar energy
 c) Biomass energy d) None of these

(740)

Q.5 Tidal energy is produced by:

- a) Moon's gravitational effect
- b) Wind speed
- c) Earth rotation only
- d) All of these

Q.6 Mini hydro plants use:

- a) Small water flow b) Solar radiation
- c) Steam pressure d) None of these

Q.7 Biomass energy comes from:

- a) Wind b) Organic matter
- c) Metals d) Water

Q.8 Wind energy depends on:

- a) Air density b) Sunlight
- c) Water flow d) Temperature only

Q.9 Geothermal energy comes from:

- a) Ocean waves b) Earth's internal heat
- c) Wind pressure d) Solar radiation

Q.10 Bio gas is also known as:

- a) Gobar gas b) LPG
- c) Steam d) None of these

(2) 180932/170955/

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

Q.11 Solar water heater works on the principle of ____.

Q.12 Solar energy is a non-conventional source of energy. (True / False)

Q.13 Wet process of biomass conversion includes ____ digestion.

Q.14 Wind energy is converted into electrical energy using ____.

Q.15 Heat obtained from earth interior is called ____ energy.

Q.16 OTEC stands for ____.

Q.17 In fuel cells, energy conversion takes place by ____ reaction.

Q.18 Small scale hydro plants are known as ____ hydro plants.

Q.19 Energy Obtained directly from natural resources is called ____ energy.

Q.20 Coal is a renewable source of energy. (True / False)

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

Q.21 Discuss the importance of non conventional energy sources.
