

- Q.25 Define substation and its types. (CO3)
 Q.26 Explain continuity test with a neat diagram. (CO2)
 Q.27 List causes of electrical accidents. (CO4)
 Q.28 Write important factors to be considered during inspection of transformer. (CO3)
 Q.29 Explain functions of lightning arrester. (CO3)
 Q.30 Explain need of Patrolling of transmission lines. (CO2)
 Q.31 List important tools used in installation. (CO2)
 Q.32 Define Breakdown maintenance. (CO1)
 Q.33 Define Bus bar and write its uses also. (CO3)
 Q.34 Write different cable jointing methods. (CO2)
 Q.35 Explain the effects of loose neutral in brief. (CO4)

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain methods of laying underground cables with diagram. (CO2)
 Q.37 Describe components of substation. (CO3)
 Q.38 Explain maintenance schedule of transformer. (CO3)

No. of Printed Pages : 4

180943

Roll No.

4th Sem / Elect.

Sub : Installation & Maintenance of Electrical Equipment

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Cutter is used for: (CO2)
 a) Cutting wires b) Measuring voltage
 c) Testing insulation d) Heating
- Q.2 Armoring provides: (CO2)
 a) Decoration
 b) Mechanical protection
 c) Cooling
 d) Insulation
- Q.3 Corrective maintenance is done when: (CO1)
 a) Equipment fails b) New equipment
 c) High voltage d) Low load
- Q.4 Fuse protect against: (CO4)
 a) Over current b) Moisture
 c) Noise d) Heat

- Q.5 Bus bar is used in: (CO3)
 a) Substation b) House wiring
 c) Motor d) Cable joint
- Q.6 Artificial respiration is given in case of (CO4)
 a) Fever b) Electric Shock
 c) Cold d) Injury
- Q.7 Transformer oil dehydration removes: (CO3)
 a) Moisture b) Steel
 c) Carbon d) Copper
- Q.8 Danger board is used for: (CO4)
 a) Safety warning b) Decoration
 c) Lighting d) Advertisement
- Q.9 Insulation test is done before: (CO2)
 a) Commissioning cable
 b) Painting
 c) Loading
 d) Cooling
- Q.10 Pole-mounted substation is installed on: (CO3)
 a) Pole b) Ground
 c) Underground d) Roof

(2)

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 SWG stands for ____, (CO2)
 Q.12 Device to isolate supply is called _____. (CO2)
 Q.13 Line inspection is called _____. (CO2)
 Q.14 Earthing reduces electric shock risk. (True / False) (CO4)
 Q.15 Fuse wire has low melting point. (True / False) (CO4)
 Q.16 Supporting wire of pole is called ____ wire. (CO2)
 Q.17 Preventive maintenance increases life. (True / False) (CO1)
 Q.18 Place where voltage changes is called _____. (CO3)
 Q.19 Control room should be disturbance free. (True / False) (CO3)
 Q.20 Two safety devices are ____ and _____. (CO4)

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Define maintenance and list its types. (CO1)
 Q.22 Explain purpose of earthing. (CO4)
 Q.23 Write safety precautions while working. (CO4)
 Q.24 Explain laying of underground cables. (CO2)
