

- ### SECTION-D
- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Draw and explain the electrical circuit used in refrigeration. (CO4)
- Q.37 Explain different type of mechanical load. Draw their characteristics also. (CO1)
- Q.38 Define electric arc heating. Explain construction and working of direct and indirect heating. (CO2)

180955

- To protect the metal against corrosion
- To give shiny appearance to articles

180955

- c) To repair the worn-out materials  
d) All of these
- Q.5 The most modern method for food processing is (CO1)  
a) Eddy current heating b) Dielectric heating  
c) Induction heating d) Resistance heating
- Q.6 Where does pure metal gets deposited after passing current (CO3)  
a) Cathode b) Anode  
c) Electrolyte d) Negative pole
- Q.7 For Arc welding DC is produced by (CO2)  
a) Regulator b) Transformer  
c) Motor generator set d) None of these
- Q.8 Size of domestic refrigerator is given in (CO4)  
a) Liter b) Ton  
c) Meter d) Watt
- Q.9 For arc heating electrodes are made of (CO1)  
a) Cu b) Al  
c) Graphite d) ACSR
- Q.10 The Area under the speed time curve represents (CO6)  
a) Acceleration of train  
b) Time taken by train  
c) Distance travelled train  
d) Crest speed

## SECTION-B

**Note:** Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Define welding. (CO2)  
Q.12 Define electric drive. (CO5)  
Q.13 Insulating material is heated by which heating? (CO1)  
Q.14 In railway \_\_\_\_\_ is used as return conductor. (CO6)  
Q.15 Electroplating is an example of deposition \_\_\_\_\_. (CO3)  
Q.16 What is traction? (CO6)  
Q.17 Modes of heat transfer are. (CO1)  
Q.18 The most popular current collector is \_\_\_\_\_. (CO4)  
Q.19 Desert cooler can function only \_\_\_\_\_ season. (CO4)  
Q.20 MIG stand for \_\_\_\_\_. (CO2)

## SECTION-C

**Note:** Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain the term current efficiency and energy efficiency used in electrolytic process. (CO3)  
Q.22 Define Belt drives. Also explain the merit over other types of drives. (CO5)  
Q.23 Draw the block diagram of EMU. (CO6)  
Q.24 Differentiate between individual and group drive. (CO5)
