

- Q.25 Explain different house of 8051.
- Q.26 Explain Basic features of PIC Micro controller.
- Q.27 Draw the Pin Diagram of 8051 Micro controller.
- Q.28 What do you understand by Assembler directive. Explain 3 directives with examples.
- Q.29 Explain the interfacing of seven segment LED with 8051.
- Q.30 Define SFR. Explain function of any 5 SFR.
- Q.31 Explain the interfacing of keypad with micro controller.
- Q.32 Explain timers in 8051 Micro controller.
- Q.33 Explain five data transfer instruction of 8051.
- Q.34 What is Stack. Explain POP and PUSH instruction.
- Q.35 Write any five differences between PIC and 8051 micro controller.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain the block diagram of 8051.
- Q.37 Explain various addressing modes of 8051 Micro controller.
- Q.38 Explain the interrupt system of 8051 micro controller.

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 In 8051 Microcontroller, crystal oscillator has frequency of _____
- a) 20 MHz b) 11.0598 MHz
c) 18.235 MHz d) 5.52 MHz
- Q.2 Timer 0 in mode 1 is _____ bit timer
- a) 8 bit b) 13 bit
c) 16 bit d) None of the above
- Q.3 CISC stands for
- a) Complex Instruction Set Computer
b) Comprehensive Instruction specific Computer
c) Common Instruction Standing Computer
d) Contract Instruction Set Computer
- Q.4 The value of PC after reset for 8051 micro controller is _____.
- a) 0000H b) FFFFH
c) 0007H d) None of the above

(1) 181055/171055/125952

Q.5 _____ is 8051 micro controller will allow the controller to send and receive data's just by using two pins.

- a) SPI b) USART
- c) UART d) 12C

Q.6 PSW of 8051 is _____ bit wide.

- a) 1 b) 4
- c) 8 d) 16

Q.7 _____ contains the address of the external memory to be accessed.

- a) SCON Register b) Data Pointer Register
- c) Register B d) PCON Register

Q.8 Stack Pointer (SP) in 8051 is _____ bit wide

- a) 1 bit b) 4 bit
- c) 8 bit d) 16 bit

Q.9 Set of instruction is known as _____.

- a) Program b) Instruction Set
- c) Addressing Mode d) None

Q.10 Which among the following is not bit addressable in 8051

- a) A b) P0
- c) PSW d) PCON

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

Q.11 8051 has _____ I/O Pins.

Q.12 USART stands for _____.

Q.13 One Byte = _____ bits

Q.14 The storing operation of a CPU register in the stack is known as _____.

Q.15 Full form of SFR is _____.

Q.16 ADD, ADDC, SUBB, MUL, DIV comes under _____ group instructions.

Q.17 Write one example of Immediate Addressing Mode.

Q.18 Language which is in the form of 0 and 1 and only machine can understand is _____

Q.19 Number of Timers available in 8051 is _____

Q.20 Full form of PIC is _____

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

Q.21 Write any five advantages of Micro controller.

Q.22 Explain the working of DAC.

Q.23 Explain EQU and DB assembly directive.

Q.24 Draw the diagram of port P2 and explain its working.
