

- Q.28 Define the term Cross compiler. (CO2)
 Q.29 How is ASM code or C program transferred to Micro controller. (CO3)
 Q.30 List out various uses of timers in embedded system? (CO1)
 Q.31 Define the term Real Time Clock. (CO1)
 Q.32 What is the Real-Time operating system. (CO2)
 Q.33 How I/O devices are classified for embedded system? (CO2)
 Q.34 List some features of embedded systems. (CO1)
 Q.35 Compare embedded system and non-embedded system with examples. (CO1)

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain the embedded system architecture with neat and clean diagram. (CO1)
 Q.37 Compare PIC micro controller with AVR micro controller. (CO2)
 Q.38 Draw the block diagram of AVR micro controller and explain each block in detail. (CO2)

No. of Printed Pages : 4

Roll No.

6th Sem / Eltx. Sub : Embedded Systems

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Which of the following is an example for not a wireless communication interface? (CO1)
 a) RS-232C b) Wi-Fi
 c) Blue tooth d) None
- Q.2 When AVR wakes up, then the value of PC becomes? (CO3)
 a) 00H b) 000H
 c) 0000H d) 00000H
- Q.3 Which of the following can make the application program hardware independent? (CO2)
 a) Software b) Application manager
 c) Operating system d) Kernel
- Q.4 Which part of the software is transparent to the interrupt mechanism? (CO3)
 a) Background
 b) Foreground
 c) Both background & foreground
 d) Lateral ground

- Q.5 How many memory cells are present in 1 Kb RAM? (CO1)
 a) 1024 b) 8192
 c) 512 d) 2048
- Q.6 The first recognized modern embedded system is (CO2)
 a) Apple computer
 b) Apollo guidance computer
 c) Calculator
 d) None
- Q.7 Which of the following processor architecture was separate bus for code memory and data memory. (CO3)
 a) Harvard b) VonNeumann
 c) Both (a) & (b) d) None
- Q.8 Which of the following includes its own I/O routine? (CO1)
 a) Hardware b) Kernel
 c) Operating system d) Application manager
- Q.9 Which of the following speed up the testing process? (CO1)
 a) Kernel
 b) Software
 c) Application manager
 d) Program debugging tools
- Q.10 Which of the following allows the splitting of the software (CO3)
 a) Wait statement b) Ready
 c) Interrupt d) Acknowledgement

(2) 181062C/171062C

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Expand PIC. (CO3)
 Q.12 What is cross compiler? (CO3)
 Q.13 Define term Reliability. (CO2)
 Q.14 One byte is equal to two nibble (True/False) (CO1)
 Q.15 Give one characteristic of embedded systems. (CO2)
 Q.16 What is Watchdog Timer? (CO2)
 Q.17 List different buses used for communication in embedded system. (CO1)
 Q.18 What is emulator? (CO2)
 Q.19 What is an Embedded System? (CO1)
 Q.20 What do you about the memory leak? (CO1)

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Write applications of PIC micro controller. (CO3)
 Q.22 Discuss the steps involved in interfacing of LED. (CO2)
 Q.23 What are buses used for communication in embedded system? (CO3)
 Q.24 List some characteristics of embedded systems. (CO3)
 Q.25 List some features of embedded systems. (CO1)
 Q.26 Discuss about Pipelining. (CO2)
 Q.27 What is the Real-Time operating system. (CO2)

(3) 181062C/171062C
