

- Q.29 Describe some factors affecting the rate of freezing?
- Q.30 Write the principle of food preservation by radiation?
- Q.31 What is the difference between concentration and evaporation?
- Q.32 List the permitted class II preservatives. What are the functions of artificial sugar in foods?
- Q.33 How will you judge the end point of a jam and jelly?
- Q.34 Describe working principle of tunnel drier with a well labeled diagram?
- Q.35 Define Jam? Draw the neat and clean flow chart of processing of Jam?

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 What do you understand by canning? Explain with neat and clean flowchart.
- Q.37 Enlist different dryers used in food industries. explain any 2 of them with a well labeled diagram?
- Q.38 Define the refrigeration process? Explain vapor absorption and vapor compression refrigeration system?

3rd Sem / Food Technology

Sub : Principles of Food processing & Preservation

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Food preservation is mainly done to
- Improve appearance
 - Increase shelf life
 - Increase weight
 - Reduce cost
- Q.2 Water activity in food affects
- Taste
 - Colour
 - Microbial growth
 - Packaging
- Q.3 Pasteurization temperature is generally
- Below 100°C
 - Above 150°C
 - Below 0°C
 - Exactly 100°C
- Q.4 Preservation by sugar works by
- Increasing acidity
 - Lowering water activity
 - Increasing temperature
 - Increasing oxygen
- Q.5 Pickling involves the use of
- Sugar and heat
 - Oil, salt and acid
 - Drying and freezing
 - Only preservatives

031133

- Q.6 Canning involves
 a) Freezing food b) Heating and sealing
 c) Drying food d) Adding preservatives
- Q.7 Which method uses low temperature?
 a) Canning b) Drying
 c) Refrigeration d) Smoking
- Q.8 Shelf life of food is affected by
 a) Storage conditions b) Processing method
 c) Packaging d) All of the above
- Q.9 Sun drying is an example of
 a) Artificial drying b) Natural drying
 c) Chemical drying d) Mechanical drying
- Q.10 The principle of hurdle technology is
 a) Single preservation method
 b) Combination of preservation methods
 c) Only heat treatment
 d) Only chemical preservatives

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 _____ is the term for keeping micro organisms out of food by using sanitary methods. (Asepsis / Sterilization)
- Q.12 A clear, transparent spread made from strained fruit juice and sugar is known as _____.

(2) 181133/121133/
031133

- Q.13 Who is the father of canning?
- Q.14 What is the common name of Ascorbic Acid?
- Q.15 Before drying, vegetables should be _____ (Blanched / Sterilized)
- Q.16 Name any 2 class II preservative?
- Q.17 Quick freezing of food produces small type of ice-crystals. (True / False)
- Q.18 What instrument is used to measure TSS in Jam?
- Q.19 Pasteurization destroys all micro organisms, including spores. (True / False)
- Q.20 _____ is often referred to as "cold sterilization" because it kills microbes without heat.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain the principles and importance of food preservation?
- Q.22 Explain Pasteurization in detail?
- Q.23 Classify the food on the basis of shelf life and pH?
- Q.24 Explain the techniques of pickling?
- Q.25 What are the methods of preventing spoilage of perishables?
- Q.26 What is spoilage? Enlist causes of spoilage?
- Q.27 Write a brief note on IMF foods?
- Q.28 What do you understand by refrigeration load?
