

- Q.25 Write a note on milk proteins.
- Q.26 Describe the manufacture of curd (dahi).
- Q.27 Write a short note on spray drying of milk.
- Q.28 What is UHT Milk? Mention its advantages.
- Q.29 Write a short note on ice cream ingredients.
- Q.30 Write a note on ghee manufacture.
- Q.31 Explain the importance of quality control in milk.
- Q.32 What is standardization of milk? Why is it necessary?
- Q.33 Write a short note on condensed milk.
- Q.34 Write a note on cheese ripening.
- Q.35 Write a note on whey and its utilization?

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain different physical and chemical properties of milk constituents.
- Q.37 Describe the general procedure of making butter with a neat flow diagram.
- Q.38 What is detergent? Explain the cleaning and sanitization process of dairy equipments.

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 HTST (High – Temperature Short time) pasteurization for milk requires:
- 63°C for 30 minutes
 - 72°C for 15 second
 - 80°C for 5 seconds
 - 121°C for 2 second
- Q.2 The process of breaking down fat globules to less than 2 microns to prevent cream separation is called:
- Pasteurization
 - Sterilization
 - Homogenization
 - Clarification
- Q.3 The Gerber Test is used to determine the percentage of _____ in milk.
- Protein
 - Lactose
 - Fat
 - Ash
- Q.4 Milk is a rich source of which mineral that helps in bone formation?
- Iron
 - Sodium
 - Iodine
 - Calcium

(1) 181141/121141/031141

Q.5 The slightly yellowish colour of cow milk is due to:

- a) Fat content b) Carotene
- c) Lactose d) Boiling

Q.6 The pH of fresh normal whole milk is typically:

- a) 4.5 – 5.0 b) 6.5 – 6.7
- c) 7.5 – 8.0 d) 8.5 – 9.0

Q.7 Which test is used to measure the efficiency of the pasteurization process?

- a) Phosphatase Test b) COB Test
- c) MBRT Test d) Gerber Test

Q.8 “Toned Milk” must contain a minimum fat percentage of:

- a) 3.0% b) 1.5%
- c) 4.5% d) 6.0%

Q.9 Which of the following is the first step in a standard 7 step CIP sequence?

- a) Alkaline wash b) Acid wash
- c) Pre-rinse d) Final sanitization

Q.10 “COP” stands for which type of cleaning in a dairy plants?

- a) Control of Processing
- b) Centralized Organic Processing
- c) Cleaning on point
- d) Cleaning Out of Place

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

Q.11 The major protein present in milk is _____.

Q.12 The carbohydrate present in milk is called _____.

Q.13 Name any two indigenous milk products.

Q.14 cream is separated from milk using _____ force.

Q.15 Ghee mainly consists of _____ percent milk fat.

Q.16 The legal minimum fat content of cow milk in India is _____ percent.

Q.17 Condensed milk is preserved mainly due to high _____ concentration.

Q.18 Milk is an _____ type emulsion.

Q.19 COB stands for _____.

Q.20 Freezing point of milk is _____ (higher / lower) than water.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

Q.21 Explain the composition of milk.

Q.22 Define pasteurization and state its objectives.

Q.23 What is homogenization? Write its advantages.

Q.24 Explain the cream separation process.
