

- Q.28 Write the advantages and limitations of natural and synthetic media.
- Q.29 Write the construction materials used for fermenters and their properties.
- Q.30 Explain the functions of agitator, sparger and baffles.
- Q.31 Write the maintenance and cleaning of a fermenter.
- Q.32 Define alcoholic beverages and classify them.
- Q.33 What is distillation? Explain its importance in beverage production.
- Q.34 Explain the production technology of curd.
- Q.35 Explain the production of vinegar.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Describe the design and construction of a fermenter with neat labeled diagram.
- Q.37 Explain in detail the process of wine and beer production.
- Q.38 What is Single Cell Protein? Explain its sources, microorganisms used, production process, nutritive value, advantages and limitations.

No. of Printed Pages : 4

181144/121144/031144

Roll No.

4th Sem / Food Technology Sub : Food Fermentation Technology

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Anaerobic fermentation means:
- a) With oxygen b) Without oxygen
 - c) With sunlight d) With heat
- Q.2 Fermented foods are rich in:
- a) Pathogens b) Toxins
 - c) Pesticides d) Vitamins
- Q.3 Temperature control in fermentor is important to:
- a) Maintain microbial growth
 - b) Increase contamination
 - c) Stop mixing
 - d) Reduce yield
- Q.4 Yeast used in baking is:
- a) Rhizopus
 - b) Saccharomyces cerevisiae
 - c) Lactobacillus
 - d) Aspergillus

- Q.5 The sparger in a fermentor is used to:
- Heat medium
 - Cool medium
 - Supply air
 - Remove foam
- Q.6 Sauerkraut is prepared from:
- Carrot
 - Radish
 - Turnip
 - Cabbage
- Q.7 Growth media prepared from natural sources is called
- Natural media
 - Synthetic media
 - Artificial media
 - Selective media
- Q.8 Rum is produced from:
- Barley
 - Grapes
 - Molasses
 - Milk
- Q.9 The process of maintaining pure culture is called:
- Inoculation
 - Sterilization
 - Culture maintenance
 - Filtration
- Q.10 Distillation is a process of separation based on:
- Density
 - Solubility
 - Boiling point
 - Color

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Fermentation is carried out mainly by ____.
- Q.12 Which acid is present in Vinegar?

- Q.13 The vessel used for fermentation is called a ____.
- Q.14 Which device is used for supplying air in a fermentor?
- Q.15 Mixing in a fermentor is done by a/an ____.
- Q.16 Miso is a traditional fermented product of Soyabean. (True / False)
- Q.17 Single Cell Protein is obtained from ____.
- Q.18 Foam formation during fermentation is controlled by adding ____ agents.
- Q.19 The first step in beer production is ____.
- Q.20 The process of adding microorganisms to substrate is called ____.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Define fermentation and explain its importance in food processing.
- Q.22 Classify the fermentation on the basis of end products.
- Q.23 Write the advantages and limitations of fermentation.
- Q.24 Explain the nutritive value of fermented food products.
- Q.25 What is growth media? Explain its types.
- Q.26 Write the composition of fermentation media.
- Q.27 Explain the role of molasses and corn steep liquor in fermentation.
