

- Q.25 Write the advantages and disadvantages of metal as packaging material.
- Q.26 Write the advantages and disadvantages of plastic as packaging material.
- Q.27 Briefly explain about tetra packaging.
- Q.28 Explain thermoplastic and thermoset plastic with suitable examples.
- Q.29 Mention the steps involved in bagging.
- Q.30 Briefly explain about working of FFS machines.
- Q.31 Explain about aseptic packaging.
- Q.32 Briefly explain about drop test and its significance.
- Q.33 Briefly explain the principles of food packaging.
- Q.34 Write the advantage and disadvantages of paper as packaging material.
- Q.35 Explain cryo-vac process of vacuum packaging.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain rules and regulations related to food packaging.
- Q.37 Describe in detail the packaging requirements for milk and milk products.
- Q.38 Explain bottling operation in detail.

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 A green colored circle and square on the packaged food indicates _____.
a) Vegetarian food b) Non vegetarian food
c) Both 'a' & 'b' d) None of these
- Q.2 In controlled atmospheric storage, which gas is used _____.
a) CO₂ b) NO₂
c) O₂ d) SO₂
- Q.3 Types of food packaging
a) Primary b) Secondary
c) Tertiary d) All of these
- Q.4 Colour of kraft paper is _____.
a) Blue b) White
c) Green d) Brown
- Q.5 Main disadvantages of glass as packaging material is _____.
a) Porosity and density
b) Clarity and printability

(1) 181161/121161/031161

- c) Heavy weight and fragile
d) None of these
- Q.6 Monomer for polyethylene is
a) Silica b) Ethylene
c) Propylene d) Styrene
- Q.7 In paper manufacturing _____ in wood pulp is removed by washing
a) Fibers b) Lignin
c) Moisture d) None of these
- Q.8 Regenerated cellulose films are
a) PVC b) EVA
c) Cellophane d) Nylon
- Q.9 Packaging in which packaging material contract on product when heated is called _____
a) Aseptic b) Active
c) Shrink d) Vacuum
- Q.10 Combining two or more than two films into a single film is known as
a) Kraft paper b) Lamination
c) Restorable pouch d) None of these

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 A techno-economic function aimed at minimizing costs of delivery while maximizing sales is called.
- Q.12 In case of kraft paper, the word "kraft" originates from _____.

(2) 181161/121161/031161

- Q.13 Plastic that can be soften by heating and hardened by cooling is known as _____.
- Q.14 WVTR stands for _____.
- Q.15 A package used as a protective package for the primary package is called _____.
- Q.16 Technique used to measure the durability of a material by dropping it from a predetermined height _____.
- Q.17 Number of layers of packaging material in a tetra packs is _____.
- Q.18 FFS stands for _____.
- Q.19 Packaging in which sterile product packed into a sterile container under aseptic condition is called.
- Q.20 OTR stands for _____.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Differentiate between primary and secondary packaging materials with suitable examples?
- Q.22 Explain functions of food packaging.
- Q.23 Explain different types of packs with suitable example.
- Q.24 Tabulate the packaging materials and forms in which they are used.
