

Q.25 Define:

- a) Hygiene b) Sanitation
- c) Crude fiber d) Adulteration
- e) Viscosity

Q.26 Discuss quality assurance. Why it is required?

Q.27 Differentiate between subjective and objective method for sensory control.

Q.28 Summarize the concept of VACCP.

Q.29 Discuss the layout of control laboratory.

Q.30 Differentiate between viscosity and consistency

Q.31 How quality of the products is related with its color.

Q.32 How panel is selected for sensory evaluation?

Q.33 How GMP differs from GLP?

Q.34 Summarize the role of central and state government in imparting quality control.

Q.35 Describe the methods of evaluation of food adulterants.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

Q.36 Explain the meaning, need, concept and components of quality control.

Q.37 Explain the physicochemical mechanical properties of food. How are they related to quality of food?

Q.38 Explain the seven principles of HACCP. Discuss the pre requisites of HACCP.

Roll No.

6th Sem / Food Technology Sub : Food Analysis & Quality Control

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

Q.1 Peroxide value is the measure of

- a) Protein quality
- b) Fat quality
- c) Sugar quality
- d) Vitamin content in food

Q.2 Soxhlet method is based upon principle of

- a) Chemical analysis b) Solvent extraction
- c) Colorimetry d) Chromatography

Q.3 Which of the sensory evaluation methods involves trained panels

- a) Analytical sensory evaluation
- b) Affective analysis
- c) Both a and b
- d) neither a nor b

Q.4 FPO stands for

- a) Food production operation
- b) Food product order
- c) Flavour production office
- d) Food procurement order

(1) 181162/121162/31162

- Q.5 As per FSSAI “Use by date” is used for the products with shelf life of
- Less than 7 days
 - 24 hours
 - Less than 1 month
 - Less than 6 months
- Q.6 The term CCP used in HACCP stands for
- Cross category principles
 - Critical Certification Policy
 - Cross Contact Points
 - Critical Control Points
- Q.7 Viscosity in the food can be increased by addition of
- Sodium chloride
 - Sodium carbonate
 - Sodium benzoate
 - Sodium alginate
- Q.8 Sanitation and Hygiene Test is
- TPC
 - Coliform test
 - Yeast test
 - Mould test
- Q.9 Kjeldahl method is used for determination of-
- Crude Protein
 - Crude Fat
 - Sugars
 - Vitamin content
- Q.10 The food industry sensory evaluation involves
- To develop new products by modifying existing formulations
 - To develop hidden attributes
 - To check the nutrition quality
 - To check toxicity

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Define TQM.
- Q.12 List two factors affecting food safety.
- Q.13 Interpret the meaning of “Adulterants in food.”
- Q.14 Give the full form of GHP.
- Q.15 The term gustatory in sensory science refers to _____.
- Q.16 Tell the objective of HACCP.
- Q.17 Tell the name of two instruments used to measure food color.
- Q.18 Name the type of components for which Barfoed's test is carried out.
- Q.19 “Economically motivated adulteration is also called Food fraud. Why is it so?”
- Q.20 Discuss about four A's of food defense.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Discuss manual sampling.
- Q.22 Discuss the principle behind analysis of ash.
- Q.23 Summarize the objectives of quality control.
- Q.24 Describe the sampling procedure for granular materials.
