

- Q.25 Write short note on Rotating Biological contractors of waste water treatment.
- Q.26 What are the points to be considered before selecting disposal techniques?
- Q.27 Define food waste and enlist its characteristics.
- Q.28 Make a list of various food industries producing waste and define any one.
- Q.29 How waste management and co-product recovery is done in dairy industry?
- Q.30 Write short note on coarse screening.
- Q.31 Make a list of Primary treatment of waste water and define any one.
- Q.32 What are the precautions to be taken in maintaining and operating ETP in a food industry?
- Q.33 What is turbidity? How will you remove it?
- Q.34 What are the steps for improving waste management and co-product recover in vegetable oil processing?
- Q.35 What is the method of recovery and reuse of trimmings and pulps from fruit and vegetable processing?

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Describe the working of upward flow sand filter with the help of diagram.
- Q.37 What is EPA and specifications for effluent of different food industries?
- Q.38 Describe in detail vermin-composting and biogas generation with neat and clean diagram?

No. of Printed Pages : 4

181163/121163/031163

Roll No.

6th Sem / Food Technology Sub : Waste Management in Food Industry

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 TOC is _____
- Total organic chemnica
 - Total Oxidized Carbon
 - Total organic Carbon
 - None of the above
- Q.2 What is the depth of the trickling filter?
- 0.5 – 1m
 - 1-1.5m
 - 1.5=2m
 - 2-3m
- Q.3 _____ is used as an indicator test to determine the general quality of the water.
- Oxidation test
 - Reduction test
 - Total dissolved solids test
 - Organic test
- Q.4 What is the chemical formula of aluminum sulphate?
- $Al_2(SO_4)_3$
 - $Al_2(SO_4)_3$
 - $Al_2(SO_4)$
 - $Al(SO_4)$

- Q.5 pH range for neutral fluid is _____
 a) 1 b) 5
 c) 7 d) 10
- Q.6 What is the order of waste management hierarchy, from most to least favored?
 a) Prevention – Recycle -Reuse-Disposal
 b) Prevention-Reuse-Disposal-Recycle
 c) Prevention-Disposal-Reuse-Recycle
 d) Prevention-Reuse-Recycle-Disposal
- Q.7 Which of the following instrument is used to measure turbidity?
 a) Lactometer b) Turbidity meter
 c) Thermometer d) Spectrophotometer
- Q.8 COD is _____.
 a) Chemical Oxygen Demand
 b) Chemical oxidized demand
 c) Carbon Oxygen Demand
 d) None of the above
- Q.9 What is vermicomposting?
 a) Composting by birds
 b) Composting by rats
 c) Composting by worms
 d) compositing by chemicals
- Q.10 _____ of the sample must be measured on site.
 a) BOD b) COD
 c) TEMPERATURE d) TDS

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 The provisions for environmental protection in the constitution were made in _____.
- Q.12 What is the shape of the oxidation ditch?
- Q.13 Name two by products of milk processing industry.
- Q.14 The simplest and most common method used in municipal waste to collect and dump the waste in a _____.
- Q.15 _____ indicates biological characteristics of industrial waste water.
- Q.16 In India, the average temperature of sewage is _____.
- Q.17 Full form of TDS is _____.
- Q.18 What are the two main products of anaerobic digestion?
- Q.19 Which chemical is used in flocculation?
- Q.20 Write example of heavy metal?

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Write short note on reduction of food waste.
- Q.22 How heavy metals are removed from waste? Please explain.
- Q.23 Make a list of common solid waste disposal methods and define composting.
- Q.24 Write short note on Flocculation of waste water treatment.
