

- Q.22 What are the types of land line telemetry? Explain position telemetry.
- Q.23 Write a short note on time division multiplexing.
- Q.24 Discuss the HART communication protocol.
- Q.25 What are the inter bus and profit bus?
- Q.26 Write a short note on fiber optic communication.
- Q.27 Explain all the electric transmitter.
- Q.28 Write a short note on frequency division multiplexing.
- Q.29 Explain amplitude modulation with diagram.
- Q.30 Write down the applications of telemetry.
- Q.31 Draw and explain the block diagram of telemetry system.
- Q.32 Write a short note on force balance type pneumatic transmitter.
- Q.33 Discuss about the GPIB.
- Q.34 Discuss about the ETHERNET / LAN.
- Q.35 Explain briefly about the block diagram of PAM.

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 What is transmitter? Explain pneumatic and hydraulic transmitter in detail.
- Q.37 What are the classifications of telemetry system? Explain PAM and PCM with their block diagram.
- Q.38 What is telemetry? What are the applications of it? Draw and explain the block diagram of general telemetry system

No. of Printed Pages : 4 181545/121545/031545
Roll No.

4th Sem / IC

Sub : Industrial Communication / Principles of Telemetry

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Which of the following is one of the method of data transmission?
a) Asynchronous b) Synchronous
c) Parallel d) All of the above
- Q.2 Choose the incorrect land line telemetry?
a) Voltage telemetry
b) Amplitude modulation
c) Current telemetry
d) Position telemetry
- Q.3 Which of the following is not the R.F. Telemetry?
a) Amplitude modulation
b) Current telemetry
c) Frequency modulation
d) None of the above
- Q.4 Choose the incorrect one.
a) PDPT bellow type is pneumatic transmitter
b) Force balance type is pneumatic transmitter
c) Inductive type is hydraulic transmitter
d) Bellow type is hydraulic transmitter
- Q.5 _____ modulates a carrier wave's phase to

(1) 181545/121545/031545

encode digital data, offering high bandwidth efficiency and noise immunity for satellite, aerospace and biomedical applications.

- a) PSK b) FSK
- c) PCM d) ASK

Q.6 PAM stands for

- a) Pulse area modulation
- b) Pulse amplitude modulation
- c) Phase amplitude modulation
- d) Phase area modulation

Q.7 _____ a device that converts physical parameter such as pressure, temperature, or displacement into a measurable resistance change.

- a) Resistive transmitter
- b) PDPT transmitter
- c) Inductive transmitter
- d) Bellow type transmitter

Q.8 _____ is a digital technique that combines multiple low-data-rate signals into one high-data-rate channel by assigning, or interleaving specific, rotating time slots to each input signal.

- a) TDM b) AM
- c) FDM d) FM

Q.9 _____ is a method for transmitting data based on positioning or, more commonly in modern radio control, the ratio of telemetry packets to command packets.

- a) Voltage telemetry b) Ratio telemetry
- c) Current telemetry d) Position telemetry

Q.10 PSK stands for

- a) Phase shift keying b) Pulse shift keying
- c) Part shift keying d) None of the above

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

Q.11 Expand PCM.

Q.12 Define telemetry.

Q.13 What is PAM?

Q.14 Expand GPIB.

Q.15 _____ is the leading open Industrial Ethernet standard for automation, facilitating fast, reliable and real-time data exchange between controllers, devices and systems.

Q.16 Give any one example of pneumatic transmitter.

Q.17 Define ASK.

Q.18 Time division multiplexing is a digital technique that combines multiple low-data-rate signals into one high-data-rate channel by assigning or interleaving specific rotating time slots to each input signal. (True/False)

Q.19 What is transmitter?

Q.20 Define P.M.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

Q.21 Write a short note on the methods of data transmission.
