**4th Sem. / Auto, Mech, Prod, T&D, GE, CNC,
CAD/CAM, Metallurgy, Found, & Forg., Adv. Manuf.
Tech., Mech Engg (Fabrication Tech), Mech Engg
(CAD/CAM Dsgn & Robotics)**

Subject : Workshop Technology-II

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 The angle that prevents the tool flank from rubbing against the workpiece is called
- a) Rake angle b) Clearance angle
c) Cutting edge angle d) Lip angle
- Q.2 Which of the following is used to support long workpieces to prevent bending?
- a) Chuck b) Tailstock
c) Tool post d) Carriage
- Q.3 Which of the following operations is performed to produce a smooth, shiny and checkered surface on a workpiece?
- a) Turning b) Threading
c) Knurling d) Boring
- Q.4 The jigs are commonly used for following operations

(1) 181744/171744/121744
/031744

- | | |
|-------------|-----------|
| a) Sulfur | b) Water |
| c) Nitrogen | d) Oxygen |

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Too large clearance angles, makes cutting edge _____. (strong/weak)
- Q.12 Boring tool is used for boring _____ holes.
- Q.13 The centre of tail stock is known as _____.
- Q.14 Function of boring bar is _____.
- Q.15 Name the cutting fluid used for HSS.
- Q.16 Fixtures are _____ in construction than jigs. (Heavy/light)
- Q.17 Cutting takes place in _____ stroke of shaper.
- Q.18 Does lathe can be used for cube face job? (True/False)
- Q.19 Give one difference of ream and boring.
- Q.20 The tooling cost is _____ in broaching operation. (High/Low)

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain taper turning attachment in lathe.
- Q.22 Show the nomenclature of a twist drill.
- Q.23 Differentiate between counter boring and counter sinking.

- Q.24 Give difference of shaper and planer.
- Q.25 Classify boring machines.
- Q.26 Write short note on Duplex ram horizontal broach.
- Q.27 Give the differences of Jigs and fixtures.
- Q.28 Name various types of planer.
- Q.29 Write short note on capstan lathe.
- Q.30 Explain cutting speed, feed and depth of cut in Lathe operations.
- Q.31 Show drill holding device with a neat sketch.
- Q.32 What is the difference between cutting fluid and lubricant? Explain.
- Q.33 Write short note on form turning.
- Q.34 Give the main parts of slotter.
- Q.35 Write short note on selection of cutting fluid for different operations.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Discuss the characteristics of Stellite, Tungsten carbide and HSS.
- Q.37 Explain the following operations on lathe-Threading knurling, facing and step turning.
- Q.38 Discuss various clamping devices.
