

No. of Printed Pages : 4 181761A/171761A/032351
Roll No.

6th Sem / Mech. Engg.
Sub : Plant Maintenance & Material Handling

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

Q.1 Commonly instrument required for testing is _____.

- a) Dial gauges b) Spirit levels
- c) Auto collimator d) All of these

Q.2 Standardization _____.

- a) Helps in improving the quality of finished goods
- b) is benefit of small scale production
- c) Both (a) & (b)
- d) None of (a) & (b)

Q.3 When one part can be assembled into the other so as to slide, this fit is known as _____.

- a) Push fit b) Driving fit
- c) Running fit d) Force fit

Q.4 In a product layout _____

- a) Higher productivity
- b) High capital investment

(1)181761A/171761A/032351

- c) Expansion is difficult
 - d) All of these
- Q.5 In the bricks foundation, the thickness of mortar joint should be ____.
- a) 12mm thick b) 10mm thick
 - c) 6mm thick d) 4mm thick
- Q.6 Accuracy in dial gauge testing is ____.
- a) 0.1mm b) 0.01mm
 - c) 0.001mm d) 1mm
- Q.7 The maintenance which is carried out at regular intervals is known as ____
- a) Corrective maintenance
 - b) Running maintenance
 - c) Preventive maintenance
 - d) Scheduled maintenance
- Q.8 When bearing pressure is parallel to shaft axis and has end thrust, the bearing is used for ____.
- a) Pivot bearing b) Collar bearing
 - c) Journal bearing d) None of these
- Q.9 Maintenance consists of the following action ____.
- a) Replacement of components
 - b) Repair of components
 - c) Service of components
 - d) All of these

Q.10 For the effective cutting of steel with hand hacksaw which one of the following coolant is suitable _____?

- | | |
|-------------|-----------------|
| a) Grease | b) Cutting oil |
| c) Land oil | d) Kerosene oil |

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

Q.11 Define the maintenance.

Q.12 To examining and reconditioning the surface waviness of waviness meter is _____.

Q.13 What is the use of Auto collimator.

Q.14 Define plant layout.

Q.15 Define machine foundation.

Q.16 Define indirect vibrations.

Q.17 Why re-calibration of instrument is needed?

Q.18 What is use of Taper sunk key.

Q.19 What is lubrication?

Q.20 Define corrective Maintenance.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

Q.21 Name the various instruments required for testing.

Q.22 What are the requirements of manpower planning?

(3)181761A/171761A/032351

- Q.23 Define inventory control? Also mention its functions.
- Q.24 Define fit & its types.
- Q.25 Explain process layout with neat sketch.
- Q.26 Give the classification of machine foundations.
- Q.27 Name the various vibration isolation methods.
- Q.28 Write a short note on spirit level.
- Q.29 What are the causes & effect of noise?
- Q.30 Write the advantages testing.
- Q.31 Define idle run test.
- Q.32 Write the objectives of preventive maintenance.
- Q.33 Define MTBF & MTTF.
- Q.34 Write the causes of failure of gears.
- Q.35 Define the foundation bolt and name the various foundation bolts.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain the various factors affecting plant layout.
- Q.37 Write the advantages & disadvantages of maintenance.
- Q.38 Write the short on any two:
- a) Overhead crane
 - b) Mobile motor crane
 - c) Bucket elevator
