6th Sem / Mech., Printing Tech.
Sub : Estimating & Costing

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Which cost estimation method involves calculating the cost of individual components of a product?
- a) Bottom up estimating
 - b) Top-down estimating
 - c) Parametric estimating
 - d) Analogous estimating
- Q.2 How is overhead cost typically allocated in cost accounting?
- a) Based on direct labour hours
 - b) Based on machine hours
 - c) Based on material costs
 - d) Based on production volume
- Q.3 What is the primary purpose of estimating the material cost in manufacturing?
- a) To determine the selling price of the product
 - b) To control inventory levels
 - c) To forecast raw material requirements
 - d) To calculate the cost of goods sold

- Q.4 Which factor is NOT considered in estimating machine shop costs?
- a) Machining time
 - b) Tear down time
 - c) Administrative salaries
 - d) Cutting speeds
- Q.5 In the context of cost accounting, what does the term "budget" refer to?
- a) Actual expenses incurred
 - b) Future projected expenses
 - c) Historical expenses
 - d) Capital investments
- Q.6 Which type of shop estimation involves calculating the cost of welding and forging operations?
- a) Machine shop
 - b) Welding shop
 - c) Foundry shop
 - d) Assembly shop
- Q.7 What is the main objective of cost accounting?
- a) To maximize profits
 - b) To minimize costs
 - c) To facilitate decision-making
 - d) To comply with regulatory requirements
- Q.8 How are selling and distribution overheads allocated in cost accounting?
- a) Based on sales revenue
 - b) Based on production volume
 - c) Based on direct labour hours
 - d) Based on customer orders

- Q.9 Which costing method is suitable for industries where each unit or job is unique?
- a) Process costing b) Job costing
 - c) Batch costing d) Contract costing
- Q.10 What is the significance of estimating the cost of production in manufacturing?
- a) To determine the profitability of the company
 - b) To calculate the return on investment
 - c) To allocate resources efficiently
 - d) To comply with tax regulations

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Define estimation.
- Q.12 What is personal budget?
- Q.13 What is idleness of worker?
- Q.14 Write name of any one foundry loss.
- Q.15 The indirect expenses which included all the expenses except direct labour direct material and direct expenses involved in the manufacturing operations are _____.
- Q.16 Estimator is _____ technical than the costing personnel.
- Q.17 The sum of direct cost of material and labour cost is known as _____ cost.
- Q.18 The two types of forging are _____ and _____ forging.
- Q.19 Define obsolescence in the context of costing.
- Q.20 Define overhead.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain the difference between personal and fatigue allowance.
- Q.22 Discuss the multiple costing method of cost accounting.
- Q.23 Explain the estimating procedure.
- Q.24 Explain Drilling, Boring & Tapping.
- Q.25 Write any five application of estimating and costing.
- Q.26 Explain the organization of estimating department.
- Q.27 Explain the factors upon which cutting speed depends.
- Q.28 Explain in detail the overhead expenses.
- Q.29 Write a note on rate of return on investment.
- Q.30 Write a short note on miscellaneous allowances.
- Q.31 What is the difference between direct and indirect expenses?
- Q.32 What is cost estimation? What are its function?
- Q.33 Enlist the various qualities of a cost estimator.
- Q.34 Explain Ladder of cost.
- Q.35 Explain Depreciation. What are its causes.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Calculate the time required for tapping a 2cm diameter hole with 0.3cm pitch tap in a mild steel plate up to depth of 2cm. Take cutting speed as 12m/min. Assume that the return speed of tap is 2 times the cutting speed.
- Q.37 Explain the calculation in weld cutting cost with a suitable example.
- Q.38 What is budget? What are its different types? Explain.
