

- Q.31 What are its advantages and limitations of preventive maintenance? (CO5)
- Q.32 Differentiate between breakdown maintenance and preventive maintenance. (CO6)
- Q.33 Explain lubrication and its importance in maintenance. (CO6)
- Q.34 Define storage and explain its objectives. (CO6)
- Q.35 Discuss the principles of good storage management. (CO6)

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Design and drawing of open die forging. (CO1)
- Q.37 Explain centrifugal casting with the help of neat sketch. (CO4)
- Q.38 Define maintenance. Explain different types of maintenance with examples. (CO6)

Note: Course Outcome (CO) mentioned in the question paper is for official purpose only.

No. of Printed Pages : 4

181863/121863/31862

Roll No.

6th Sem / Tool & Die

Sub : Forging & Casting Dies-Design & Drawing

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Smith forging is also known as _____. (CO1)
- Open die forging
 - Closed forging
 - Impression die forging
 - None of the above
- Q.2 Crank shaft, connecting rod, crane hook etc. are produced by (CO1)
- Drop forging
 - Press forging
 - Machine forging
 - Upset forging
- Q.3 Which of the following operation is used to provide insulation on cables? (CO2)
- Upset forging
 - Swaging
 - Roll forging
 - Drop forging
- Q.4 Which of the following is not a casting process? (CO3)
- Shell casting
 - die casting
 - Carbon dioxide mould casting
 - Floor casting

- Q.5 In centrifugal casting, core is made of (CO4)
 a) Sand b) Ferrous metal
 c) Non ferrous metal d) None of the above
- Q.6 In hot chamber die casting, the pressure is obtained by (CO5)
 a) Compressed air b) Steam
 c) Gas d) None of the above
- Q.7 In drop forging, the energy for deformation is supplied by: (CO4)
 a) Hydraulic pressure b) Mechanical screw
 c) Falling ram d) Flywheel
- Q.8 A forging press works mainly on the principle of: (CO4)
 a) Impact force
 b) Gradual squeezing force
 c) Centrifugal force
 d) Shearing force
- Q.9 Which forging machines is most suitable for mass production? (CO5)
 a) Smith forging b) Hand forging
 c) Press forging d) Open hearth forging
- Q.10 The upper half of a forging die is called:
 a) Anvil b) Hammer
 c) Ram die d) Bottom die

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Machine forging is also known as _____. (CO1)

(2) 181863/121863/31862

- Q.12 Define roll forging. (CO1)
- Q.13 Die casting is a type of _____ mould casting. (CO2)
- Q.14 Sand blasting is used for _____. (CO3)
- Q.15 Hot chamber is a type of _____ mould casting. (CO4)
- Q.16 _____ parts are produced by true centrifugal casting. (CO4)
- Q.17 Maintenance is mainly carried out to _____. (CO5)
- Q.18 Preventive maintenance is performed _____. (CO5)
- Q.19 Proper storage helps to _____. (CO6)
- Q.20 FIFO stands for: _____. (CO6)

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Write a short note on roll forging. (CO1)
- Q.22 Explain, in brief, open die forging. (CO1)
- Q.23 Write the advantages of forging. (CO2)
- Q.24 Write the disadvantages of open die forging. (CO2)
- Q.25 Name various die casting machines. (CO3)
- Q.26 Write the applications of die casting. (CO3)
- Q.27 Explain, in brief, slush casting. (CO4)
- Q.28 How are casting cleaned? Explain in brief. (CO4)
- Q.29 Write the advantages of die casting. (CO5)
- Q.30 Write the functions of die casting machine. (CO5)

(3) 181863/121863/31862
