

- No. of Printed Pages : 4
Roll No.

4th Sem / DMLT
Subject:- Clinical Microbiology - IV

M.M. : 100

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Describe principle, procedure and interpretation of the widal test.
- Q.37 Explain pathogenicity And lab diagnosis of cardia albicans.
- Q.38 Explain principle, techniques and interpretation of c-reactive protein.

Q.6 Immunoglobulin is found in allergic condition-

- a) IgE b) IgA
- c) IgD d) IgM

Q.7 Aspergilloma is also known as -

- a) Fungal Ball b) Black fungus
- c) Fungus Red d) Fungus bell

Q.8 Trichophyton infects-

- a) Hair b) Skin
- c) Nail d) All of them

Q.9 Which of the following immunoglobulin is pentamer?

- a) IgG b) IgM
- c) IgA d) IgD

Q.10 Mycology is known as the study of-

- a) Bacteria b) Fungus
- c) Virus d) Parasite

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

Q.11 Give the composition of SDA.

Q.12 Define Antibodies.

Q.13 Expand SDA and CMA.

Q.14 How will you collect Skin Samples for fungal infection?

Q.15 Write two uses of Penicillium.

Q.16 Explain the structure of antibodies.

Q.17 Define Mycology.

Q.18 Define flocculation.

Q.19 What is dermatophytosis.

Q.20 ASO test is used for which disease

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

Q.21 Write the procedure of KOH preparation.

Q.22 What is the difference between rhizopus and mucor fungi?

Q.23 Write down the general characteristics and lab diagnosis of zygomycetes.

Q.24 Give two examples of antigen antibody reactions.

Q.25 Write down the principle and application of agglutination reactions.

Q.26 What are superficial mycoses?

Q.27 Explain the Microscopy and culture characteristics of rhizopus and penicillium.

Q.28 Give any six general characteristics of fungi.
