

- Q.24 Explain different methods of smear preparation.
 Q.25 Write advantages of cryostat.
 Q.26 Differentiate between benign and malignant cells.
 Q.27 List equipment used during autopsy.
 Q.28 Write short note on PAS stain.
 Q.29 Write short note on FNAC procedure.
 Q.30 What is museum technique?
 Q.31 Write principal of PAP staining.
 Q.32 Write care and maintenance of microscope.
 Q.33 What are frozen sections?
 Q.34 Write short note on Masson's trichrome stain.
 Q.35 What are characteristic of a good fixative

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain the principle, reagents and procedure of H&E staining.
 Q.37 Describe automation in histopathology laboratory.
 Q.38 Explain different types of fixative used in museum technique.

No. of Printed Pages : 4

4th Sem. / DMLT

Subject : Histopathology & Cytology - II

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Which part of the cell is stained blue by Hematoxylin?
 a) Cytoplasm b) Nucleus
 c) Cell membrane d) Fat
- Q.2 The tissue taken from a living person for examination is called:
 a) Autopsy b) Biopsy
 c) Necropsy d) Smear
- Q.3 Which chemical is commonly used for decalcification?
 a) EDTA b) Alcohol
 c) Xylene d) Eosin

(540)

- Q.4 The most common embedding medium is
- Celloidin
 - Paraffin wax
 - Gelatin
 - Canada balsam
- Q.5 Which stain is used to detect tuberculosis bacteria?
- PAS
 - Gram stain
 - ZN stain
 - H & E
- Q.6 Alum in H & E stain acts as:
- Oxidizer
 - Mordant
 - Counter stain
 - Fixative
- Q.7 Oil Red O stain is used for
- Protein
 - Fat
 - Bone
 - Nucleus
- Q.8 Clearing agents make tissue:
- Hard
 - Soft
 - Transparent
 - Colored
- Q.9 FNAC stand for
- Fine Needle Aspiration Cytology
 - Fast Needle Analysis Cytology
 - Fine Node Aspiration Culture
 - None

(2) 181944/121944/
031934/1932/031944

- Q.10 Cryostat is mainly used for
- Drying slides
 - Frozen section cutting
 - Staining
 - Fixation

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Define cytology.
- Q.12 What is decalcification?
- Q.13 Full form of HCG is _____.
- Q.14 Name one fixative used in histopathology lab.
- Q.15 The gas used in cryostat is _____.
- Q.16 Define autopsy.
- Q.17 Name any one mounting media.
- Q.18 Increase in temperature will _____ decalcification.
- Q.19 Define smear.
- Q.20 Anesthesia is required in FNAC. (True/False)

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Draw and label a compound microscope.
- Q.22 Write the principle of Gram staining.
- Q.23 Write the composition of Kaiserling Solution II.
