

- Q.28 Discuss the role and applications of parameter of compatibility in polymer blends.
- Q.29 Explain principal of composite reinforcement.
- Q.30 Discuss properties and application of PPS.
- Q.31 Discuss PVC-Nitrile rubber blend and their advantages.
- Q.32 Discuss various polymers used in food packaging applications.
- Q.33 Discuss various types of fibers used in FRP industry.
- Q.34 Discuss various membrane separation techniques
- Q.35 Discuss difference between polymer blend and alloy.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Discuss
- Polymer concrete and their application
 - Conducting polymer and their application
- Q.37 Discuss various properties and application of the following
- PPO
 - POM
- Q.38 Write preparation and properties of following
- Boron fiber
 - graphite fiber

No. of Printed Pages : 4

182243/122243/032243

Roll No.

4th Sem / Plastic Engg.

**Subject:- Plastic Materials and Properties-II /
Engg. & Sp. Poly.**

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Which material is used for non-stick coating?
- PS
 - PES
 - PTFE
 - PEEK
- Q.2 PES stands for _____
- Poly ether sulphide
 - Poly ether sulphones
 - Poly ethylene sulphones
 - Poly ethylene sulphide
- Q.3 Which polymer is used for aircraft application?
- PEEK
 - PS
 - PE
 - PA
- Q.4 Which of the following is used as a Nano filler in plastic composites.
- CNT
 - Glass fiber
 - Mica
 - None of the above

(20)

(4) 182243/122243/032243

(1) 182243/122243/032243

- Q.5 PPO stands for _____
- Poly phenylene oxide
 - Poly propylene oxide
 - Poly phenylene di oxide
 - None of the above
- Q.6 Density of PTFE is _____
- 0.92 g/cc
 - 1.05 g/cc
 - 1.67 g/cc
 - 2.2 g/cc
- Q.7 Polycarbonate is characterised by _____
- High Clarity
 - Good Impact strength
 - Self extinguishing in nature
 - All of the above
- Q.8 The Plastics are _____
- Conductors
 - Semi-conductors
 - Insulators
 - Conducts at below the room temperature only
- Q.9 Which of the following has the lowest coefficient of friction?
- PES
 - PEEK
 - PEI
 - PTFE
- Q.10 Which of the following is an example of an acrylate
- PMMA
 - PC
 - PP
 - None of the above

(2) 182243/122243/032243

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Name two fibers used in FRPs
- Q.12 LCP Stands for _____
- Q.13 Write on polymer which have excellent UV resistant.
- Q.14 Write one polymer used for Aircraft Industry.
- Q.15 Define polymer blend.
- Q.16 Name two types of membrane separation method.
- Q.17 Give name of one conduction polymer
- Q.18 Give two application of acrylates.
- Q.19 Give two application of POM.
- Q.20 Give one name of Bio polymer

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Give five application of PEEK.
- Q.22 Explain Interpenetrating polymer network.
- Q.23 Explain PP/EPDM Blend and their advantages.
- Q.24 Explain biodegradable polymers.
- Q.25 Explain Effect of Reinforcement in strength of Plastic.
- Q.26 Explain preparation of Graphite fiber.
- Q.27 Explain conducting polymer with example.

(3) 182243/122243/032243
