

- Q.26 Discuss Izod impact strength test.
- Q.27 How will you measure moisture contents in plastics.
- Q.28 Define creep and stress relaxation.
- Q.29 Explain working Principle of TGA.
- Q.30 What is DSC? Where it is used.
- Q.31 Explain test specimen preparation for tensile testing machine.
- Q.32 Give visual examination test for PE and ABS.
- Q.33 Discuss Six-sigma technique for quality control analysis.
- Q.34 Discuss flame test of PMMA and Melamine formaldehyde.
- Q.35 Explain end group analysis for plastics.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 How will you measure hardness of plastics material? Explain various tests to Measure Hardness in case of plastics.
- Q.37 Explain with neat sketch, various types of pendulum impact test with standard specifications.
- Q.38 Discuss:
- Creep and stress relaxation property
 - Group detection test

No. of Printed Pages : 4

Roll No.

4th Sem / Plastic Engineering

Subject:- Plastic Testing-I

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 The tendency of a deformed solid to regain its actual proportions instantly on unloading of force is known as _____.
 a) Perfectly elastic b) Delayed elasticity
 c) Inelastic effect d) Plasticity
- Q.2 ASTM stands for _____.
 a) American Society for Tensile Measurement
 b) American Society for Testing and Materials.
 c) American Society for Tool Measurement.
 d) American Society for Tensile Material.
- Q.3 WVT stands for _____.
 a) Waste vapour test
 b) Water vapour Transmission
 c) Water value test d) None of these
- Q.4 What is unit of Stress?
 a) kg/m^3 b) kg/m^2
 c) g/m^2 d) N/m^2

Q.5 ASTM D790 is the standard for _____ test.

- a) Tensile test b) Flexural test
- c) flame test d) MFI

Q.6 MFI value indicated in _____.

- a) g/1 min b) g/100 min
- c) g/10 min d) None of these

Q.7 The unit of specific gravity is _____.

- a) Kg/m^3 b) Kg/m^2
- c) Dimension less d) None of these

Q.8 BIS stands for _____

- a) Bureau of India Standards
- b) Basic of Indian Standards
- c) British International Standards
- d) None of these

Q.9 ASTM D2240 is the standard for _____ test.

- a) Tensile test
- b) Rockwell hardness test
- c) Durometer hardness test
- d) Brinell hardness test

Q.10 _____ gives fruity smell when burn.

- a) PE b) PP
- c) PMMA d) PET

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

Q.11 Define bulk density.

Q.12 Expand VSP.

Q.13 Expand DIN.

Q.14 Define Histogram.

Q.15 Which type of flame is observed when polyvinyl chloride burns?

Q.16 PMMA burns with _____ flame.

Q.17 TGA stands for _____.

Q.18 DSC stands for _____.

Q.19 PVC gives _____ odour, when burned.

Q.20 _____ test is used to check the impact strength of plastic specimen.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

Q.21 Explain fatigue resistance test.

Q.22 Discuss the importance of pareto-charts as quality control tool?

Q.23 Discuss general test specimen preparation for plastic testing.

Q.24 Discuss water absorption test.

Q.25 Explain Rockwell hardness and Brinell hardness test.
