

- Q.28 Explain Cell-casting technique.
 Q.29 Discuss Principle of transfer moulding.
 Q.30 Discuss remedies for reducing warpages and flash in plastic components.
 Q.31 Discuss various types of compression molding machine.
 Q.32 Discuss ultrasonic welding process.
 Q.33 Explain Spray-up technique and its advantages.
 Q.34 Explain snap back forming.
 Q.35 Explain compression molding of SMC and DMC compounds.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain :
 a) Various defects and remedies of Compression moulding machine.
 b) Plug assisted forming technique.
 Q.37 With the help of neat sketch explain principle, construction and working of compression moulding.
 Q.38 Discuss -
 a) Engraving Process
 b) Electroplating process

No. of Printed Pages : 4
 Roll No.

182245

4th Sem / Plastic Engg.

Subject:- Plastic Processing Techniques-II

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Pot is _____.
 a) Where material method
 b) Where material is injected
 c) Chamber to hold and heat molding material for a transfer mold
 d) None of these
 Q.2 Mould for thermoforming process are made up _____ material.
 a) Aluminium b) Wooden
 c) Epoxy d) All of them
 Q.3 What is the ideal material for processing in compression moulding?
 a) Plastics b) Thermoplastics
 c) Thermo setting plastics
 d) Non Ferrous materials
 Q.4 DMC stands for
 a) Double molding components
 b) Durable molding components
 c) Dough molding components
 d) None of these

- Q.5 Which moulding process is associated with breathing?
- Transfer moulding
 - Injection moulding
 - Compression moulding
 - Extrusion moulding
- Q.6 What is the purpose of guide pillars in compression moulding process?
- To retain the shape
 - To maintain pressure
 - To improve distance
 - To ensure alignment
- Q.7 Unit of Impact strength determined by Izod Test is _____?
- J/m
 - J/m³
 - N-M
 - None of these
- Q.8 Bath tubs are made by _____ technique.
- Free forming
 - Pressure thermoforming
 - Match die thermoforming
 - Drape forming
- Q.9 Which process is used for manufacture of small & large Reinforced polyster product?
- Hand lay-up
 - Spray up
 - Vaccum Bag
 - Pressure Bag
- Q.10 Which one of the following is the most common polymer type in fiber-reinforced polymer composites _____?
- Elastomers
 - Thermoplastics
 - Thermosets
 - Both Elastomers & Thermoplastics

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Name two products made by casting process.
- Q.12 Give example of two products made by compression molding.
- Q.13 Define Pre-pegs.
- Q.14 From which process, canopies for racing vehicles are made?
- Q.15 Name two defects of thermoforming process.
- Q.16 Give two advantages of thermoforming process.
- Q.17 Name two different types of printing process.
- Q.18 Expand SMC.
- Q.19 Define clamping pressure.
- Q.20 Name two types of welding process.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Discuss limitations of forming process.
- Q.22 Explain various materials for forming.
- Q.23 Explain the use of sheet moulding compounds.
- Q.24 Give advantages of Hand-lay up process.
- Q.25 Discuss Calculation for line pressure of Transfer moulding.
- Q.26 Discuss pressure bag moulding.
- Q.27 Discuss filament-winding process.
