

- Q.31 Explain the working of Shirley stiffness tester.
 Q.32 Draw the illustrated diagram of ICI pill box tester.
 Q.33 Describe the procedure of measuring drape.
 Q.34 Explain the working principle of CRT type yarn strength tester.
 Q.35 Explain the working principle of grab test method.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain tensile testing of fabric by different methods.
 Q.37 Explain the working principle of bursting strength tester with the help of neat and clean diagram.
 Q.38 Describe important fabric defects, their causes and remedial measures.

No. of Printed Pages : 4

182554/122554/032562

Roll No.

5th Sem / Textile Design Sub : Testing & Quality Control – II

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Single yarn strength is generally expressed in
 a) GSM b) Tex
 c) cN/tex d) None
- Q.2 Martindale tester measures
 a) Pilling b) Abrasion resistance
 c) Bursting strength d) None
- Q.3 Fabric drape mainly depends on
 a) Fabric thickness b) Fabric stiffness
 c) Fabric colour d) None
- Q.4 Elmendorf tester is used for measuring
 a) Tensile strength b) Tearing strength
 c) Bursting strength d) None
- Q.5 Grab test measures
 a) True fabric strength
 b) Yarn strength
 c) Localized fabric strength
 d) Bursting strength

- Q.6 Warp crimp is always measured in
 a) GSM b) Percentage
 c) mm d) None
- Q.7 Fabric thickness is measured under
 a) High pressure b) No pressure
 c) Standard pressure d) None
- Q.8 In CRE principle, the rate of extension is
 a) Variable b) Constant
 c) Zero d) None
- Q.9 CSP stands for
 a) Count strength product
 b) Constant strength parameter
 c) Combined strength property
 d) None
- Q.10 Lea strength is normally measured on
 a) Single yarn b) Fabric strip
 c) Hank of yarn d) None

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 What is Pilling?
 Q.12 Define CRL principle.
 Q.13 Name one fabric stiffness tester.
 Q.14 What is crease recovery?
 Q.15 Define fabric handle.

- Q.16 Name the unit of fabric thickness.
 Q.17 Define bursting strength.
 Q.18 Which type of strength testing is done for parachute fabric?
 Q.19 Write full form of GSM.
 Q.20 What is fabric crimp?

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain single yarn strength and its importance.
 Q.22 Define CSP and its importance in testing.
 Q.23 Explain the principle of fabric thickness measurement.
 Q.24 What do you understand by warp and weft crimp
 Q.25 Define GSM and Explain the method of GSM measurement.
 Q.26 What is the importance of cover factor of fabric? Explain.
 Q.27 How the tensile strength of fabric is measured? Briefly explain.
 Q.28 Differentiate between cut strip and revelled strip method.
 Q.29 How will you calibrate tearing strength tester? Explain in brief.
 Q.30 Explain Elmendorf tearing test.
