

- Q.28 Write down the process of crabbing?
- Q.29 Write down the mechanism involved in giving soil release finish.
- Q.30 Write down the objectives of desizing, scouring and bleaching.
- Q.31 Write down the objectives of calendaring process.
- Q.32 Discuss about the Flame retarding finish.
- Q.33 Explain the water repellent finish mechanism?
- Q.34 Write objects of soil release finish?
- Q.35 Explain any one stabilization finish for wool?

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain construction and working of Zero-Zero finishing machine.
- Q.37 Explain working of an effluent treatment plant for cotton textile industry.
- Q.38 Write short note on
- Resin treatment
 - Latest development in finishing

Roll No.

6th Sem / Textile Design Sub : Textile Finishing

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Problem of creasing in cotton is overcome by using
- Stiffening Agent
 - Softeners
 - Antistatic agent
 - Cross linking agents
- Q.2 _____ finishing treatment aims to facilitate the removal of dirt through wet cleaning.
- Soil release
 - Antistatic
 - Antipilling
 - None of these
- Q.3 Decatising process is used for finishing of
- Cotton
 - Wool
 - Silk
 - None of these
- Q.4 _____ used in crease Resistant finishing is / are
- DMU
 - DMEU
 - Cross linking agents
 - All of these
- Q.5 The process of giving Dimensional stability to synthetic fabric is called _____?
- Scouring
 - Bleaching
 - Heat Setting
 - None of these

(1) 182562/122562/032554/2564

- Q.6 The machine used to prevent shrinkage in cellulosic materials is _____
- a) Stenter b) Sanforizer
c) Mangle d) None of these
- Q.7 _____ finish prevents both water and air to pass through the treated fabric
- a) Water Proof b) Water Repellent
c) Soil proof d) None of these
- Q.8 Mercerisation of cotton is carried out by _____
- a) NaOH b) NaCl
c) HCl d) None of these
- Q.9 _____ Calendaring gives higher gloss in material due to speed variation
- a) Chasing b) Friction
c) Swizzing d) None of these
- Q.10 L.O.I of textile fibres is related to _____ finish.
- a) Soil release b) Antistatic
c) Antipilling d) Flame retardant

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Name the metal used for making bowls of calendaring machine?

- Q.12 Which type of finish is given to the clothes of fire fighters?
- Q.13 Name the type of finish is given on umbrella / rain coats?
- Q.14 Name any 02 chemical finish?
- Q.15 Name the chemical used in Mercerization process?
- Q.16 _____ is known as the Universal Bleaching agent?
- Q.17 Name one cross linking resin.
- Q.18 Name the chemical used in acid milling.
- Q.19 Define Decatising.
- Q.20 Name one fire retarding agent.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Discuss chlorination process on wool.
- Q.22 Discuss the importance of crease-resistant finish.
- Q.23 Discuss the chasing calendaring.
- Q.24 Classify different type of finisher with the help of a chart and suitable examples?
- Q.25 Explain the concept of heat setting.
- Q.26 Write down the process of Universal calendaring machine.
- Q.27 Write down the process mildew proofing.
