

- Q.30 Explain working of card cutting machine.
- Q.31 Draw the Straight and centre herness ties with suitable design.
- Q.32 What is weft patterning. Give function of multiple box motion.
- Q.33 Explain working of Double lift Jacquard.
- Q.34 Explain working of Twilling Jacquard.
- Q.35 Draw Diagram and explain working of DLDC Jacquard.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain Climax dobby shedding mechanism with neat and clean sketch.
- Q.37 Differentiate between Tappet, Dobby and Jacquard.
- Q.38 What are latest development in Jacquard and explain the working of such jacquard loom and write its advantages.

No. of Printed Pages : 4

182743/122743/032743

Roll No.

4th Sem / Textile Design/Textile Technology

Subject:- Weaving Technology-II

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 What is full form of SLSC
- Sley lift single cylinder
 - Single lift single cylinder
 - Single lift single cycle
 - None of above
- Q.2 Yarns perpendicular to the selvedge in the fabric are known as
- Warp
 - Weft
 - Harness
 - None of the above
- Q.3 The motion which helps to improve the quality of fabric are
- Primary motion
 - Secondary motion
 - Auxiliary motion
 - None of these
- Q.4 What is the full form of GSM?
- gram per square meter
 - grain per square meter
 - grain per square milli meter
 - gram per square milli meter

Q.5 Which out of these is used for making complicated designs.

- a) Dobby b) Jacquard
- c) Tappet d) None of these

Q.6 Linges are

- a) Cord b) Dead weight
- c) Droppin d) None of these

Q.7 Which machine is used to punch cards.

- a) Card cutting b) Card lacing
- c) Knotting d) None

Q.8 Name of Harness mounting system is

- a) Norwich b) Norway
- c) Tokeyo d) None of the above

Q.9 Out of this which one is not a shedding mechanism

- a) Dobby b) Jacquard
- c) Reed d) None of the above

Q.10 When the picking is done by the mechanism below the wrap sheet is known as

- a) Underpick motion b) Overpick motion
- c) Beat up d) Shedding

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

Q.11 Define shedding.

Q.12 Name any two methods of shedding.

Q.13 Draw the straight and center harness ties.

Q.14 Define weft yarn in woven fabric?

Q.15 In right hand dobbie the pattern cylinder moves in _____ direction.

Q.16 Shedding in weaving is of _____ types.

Q.17 Loom speed is expressed in term of _____.

Q.18 Box motion in the loom is used for _____.

Q.19 What is selvedge?

Q.20 Differentiate between the Keighley and climax dobbie.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

Q.21 Explain in brief working of any box motion.

Q.22 Write the advantages of tapper system of shedding.

Q.23 Differentiate between SLSC and DLDC jacquard.

Q.24 Differentiate between dobbie and jacquard mechanism.

Q.25 Name the fault related with Jacquard mechanics and their possible causes.

Q.26 Briefly explain the London system of Jacquard mounting.

Q.27 What is the scope of dobbie and jacquard weaving.

Q.28 Explain card lacing in detail with diagram.

Q.29 Write how jacquard design are prepared.
